ISO 20688-2:2024-03 (E)

Biotechnology - Nucleic acid synthesis - Part 2: Requirements for the production and quality control of synthesized gene fragments, genes, and genomes

Contents

Page

Foreword ..... **v**

Introduction ..... **vi**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **1**

4 Requirements for quality management **3**
4.1 General requirements 3
4.2 Control of documents 4
4.3 Quality management system 5
4.4 Biorisk management and safety control 5

5 Requirements for resource management **5**
5.1 Facilities and environmental condition 5
5.2 Equipment and instruments 5
5.3 Raw materials 6
5.4 Personnel 6

6 Biosafety and biosecurity requirements **6**
6.1 General 6
6.2 DNA sequence screening mechanism 6

7 Requirements for quality control in production **7**
7.1 General 7
7.2 Quality control in synthetic gene fragments production 7
7.2.1 General 7
7.2.2 Sequence design 7
7.2.3 Assembly 8
7.2.4 Purification 8
7.2.5 Product preservation 8
7.3 Quality control in synthetic gene production 8
7.3.1 General 8
7.3.2 Colony screening 8
7.3.3 DNA preparation from the host cell 8
7.3.4 Sequence verification 9
7.3.5 Product preservation 9
7.4 Quality control in synthetic genome production 9
7.4.1 General 9
7.4.2 Assembly 9
7.4.3 Sequence verification 9

8 Requirements for product quality **10**
8.1 Synthetic gene fragments 10
8.1.1 General 10
8.1.2 Yield 10
8.1.3 Purity 10
8.1.4 Size 10
8.1.5 Gene cloning accuracy 10
8.2 Synthetic genes 10
8.2.1 General 10
8.2.2 Yield 10

8.2.3 Purity 11
8.2.4 Sequence 11
8.2.5 Integrity 11
8.2.6 Residual impurities analysis 11
8.2.7 Supercoiled plasmid 12
8.2.8 Bioburden 12
8.2.9 Specific quality indicators for synthetic DNA libraries 12
8.3 Synthetic genome 12
8.3.1 General 12
8.3.2 Sequence 12
9 Delivered/synthesized material specifications 13
9.1 Main information 13
9.2 Other information 13
Annex A (informative) **Example equipment and device list and their control requirements 14**
Annex B (informative) **Exemplary quality measurement methods 16**
Annex C (informative) **Electrophoretogram 18**
Annex D (informative) **Sanger sequencing 22**
Annex E (informative) **Massively parallel sequencing 23**
Annex F (informative) **Additional quality control options for synthetic gene fragments 26**
Annex G (informative) **Example ranking of the risk posed by DNA products 28**
Bibliography 29
