ISO/TS 9321:2024-06 (E)

Health informatics - General requirements of multi-centre medical data collaborative analysis

Contents

Page

Foreword ..... **iv**

Introduction ..... **v**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **1**

4 Symbols and abbreviate terms **2**

5 General requirements **2**

5.1 General 2
5.2 Data isolation 2
5.3 Terminology standardization 2
5.4 Data standardization 2
5.5 Data incremental expansion 2
5.6 Distributed network framework 3
5.7 Network scalability 3
5.8 System modularization 3
5.9 Security 3

6 Architecture and workflow **3**

6.1 Architecture 3
6.2 Workflow 5
6.2.1 Multi-centre collaborative research initiation workflow 5
6.2.2 Multi-centre collaborative research implementation workflow 6

7 Functional framework and requirements **7**

7.1 Functional framework 7
7.1.1 General 7
7.1.2 User layer 8
7.1.3 Service layer 8
7.1.4 Resource layer 8
7.1.5 System security 8
7.2 Functional requirements 9
7.2.1 General 9
7.2.2 User layer functional requirements 9
7.2.3 Service layer functional requirements 10
7.2.4 Resource layer functional requirements 12
7.2.5 System security functional requirements 13

Annex A (informative) **Examples of multi-centre medical data collaborative analysis networks** **14**

Annex B (informative) **Reference implementations** **15**

Bibliography **18**
