## Anaesthetic and respiratory equipment - Fire-activated oxygen shut-off devices for use during oxygen therapy

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	General requirements .....	2
5	Materials .....	2
5.1	General .....	2
5.2	Biological assessment of gas pathways .....	2
5.3	Oxygen compatibility .....	2
5.4	Environmental conditions .....	3
6	Design requirements .....	3
6.1	General .....	3
6.2	Specific design requirements .....	3
6.3	Inlet connector .....	3
6.4	Outlet connector .....	3
6.5	Resistance to flow .....	4
6.6	Leakage to atmosphere under maximum static pressure .....	4
6.7	Leakage to atmosphere during normal use conditions .....	4
6.8	Activation and prevention of flow of oxygen .....	5
6.9	Inadvertent disassembly .....	5
7	Requirements for fire activated oxygen shut-off devices supplied sterile .....	5
8	Packaging .....	5
8.1	General .....	5
8.2	Protection during storage and transport .....	5
9	Information supplied by the manufacturer .....	5
9.1	General .....	5
9.2	Instructions for use .....	6
Annex A (informative) Rationale .....		7
Annex B (normative) Test methods .....		9
Annex C (informative) Arrangements of fire activated oxygen shut-off devices .....		12
Annex D (informative) Hazard identification for the purposes of risk assessment .....		13
Bibliography .....		14
