Manufacturers' considerations for in vitro diagnostic medical devices in a public health emergency

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	General considerations for the design and development process	5
4.1	Safety and performance requirements	5
4.2	Quality management and risk management	6
4.3	Target condition and scientific validity	6
4.4	Assay technology	6
4.5	Intended use and risks and benefits of the device	6
4.6	Analytical performance	7
4.7	Stability	7
4.8	Clinical performance	7
5	General considerations for the risk management process	8
5.1	General	8
5.2	Risk reduction	8
6	Monitoring the device's post-market performance and quality assurance	9
6.1	General	9
6.2	Monitoring post-market performance	9
6.3	Quality assurance	9
7	Implementing a communication process	10
7.1	Establishing a communication process	10
7.2	Manufacturer responsibility	10
