ISO/TS 17117-3:2024-12 (E)

Health informatics - Terminological resources - Part 3: Terminology implementation maturity model (TIMM)

Contents

Page

Foreword ... **iv**

Introduction ... **v**

1 Scope ... **1**

2 Normative references ... **1**

3 Terms and definitions ... **1**

4 Terminology implementation maturity ... **3**
4.1 General ... 3
4.2 Purpose and audience ... 3
4.3 Implementation maturity levels ... 4

5 Pillar 1: Design of the data (data specifications) ... **4**
5.1 Terminological capabilities ... 4
5.1.1 General ... 4
5.1.2 Terminology resource selection ... 5
5.1.3 Data governance ... 7
5.1.4 Data dictionary ... 8
5.2 Maturity of terminology implementation within software product ... 8
5.2.1 Relationship to the information model ... 8
5.2.2 Software functionality ... 9

6 Pillar 2: Data capture (user interface) in healthcare implementations ... **10**
6.1 Capability to display code system content ... 10
6.2 Capability of terminology tooling ... 11
6.3 Standards conformance ... 12

7 Pillar 3: Data storage ... **12**

8 Data retrieval ... **13**

9 Data exchange and re-use ... **13**
9.1 Data exchange ... 13
9.2 Data re-use ... 14

10 Measuring maturity ... **14**

Bibliography ... **16**
