ISO/PAS 24305:2025-07 (E)

Health informatics - Guidelines for implementation of HL7 FHIR based on ISO 13940:2015, ISO 13606-1:2019 and ISO 13606-3:2019

Contents

Page

Foreword vi

Introduction vii

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Summary of the ISO 13940:2015 to FHIR R4 map 2
4.1 Goals 2
4.2 Approach 2
4.3 Findings 2
4.4 Mapping issues 2

5 Mapping of concepts from 13940:2015 to FHIR R4 2
5.1 Mapping of concepts related to healthcare actors 2
5.2 Mapping of concepts related to healthcare matters 6
5.3 Mapping of concepts related to activities 12
5.4 Mapping of concepts related to process 22
5.5 Mapping of concepts related to healthcare planning 25
5.6 Mapping of concepts related to time 29
5.7 Mapping of concepts related to responsibilities 35
5.8 Mapping of concepts related to information management 39

6 Summary of the FHIR R4 to ISO 13940:2015 map 46
6.1 Goals 46
6.2 Approach 46
6.3 Findings 46
6.4 Mapping issues 46

7 Mapping of concepts from FHIR R4 to ISO 13940:2015 47
7.1 Mapping of concepts related to foundation conformance 47
7.2 Mapping of concepts related to foundation terminology 49
7.3 Mapping of concepts related to foundation security 51
7.4 Mapping of concepts related to foundation documents 53
7.5 Mapping of concepts related to base individuals 55
7.6 Mapping of concepts related to base entities#1 58
7.7 Mapping of concepts related to base entities#2 61
7.8 Mapping of concepts related to base workflow 63
7.9 Mapping of concepts base management 65
7.10 Mapping of concepts related to clinical summary 67
7.11 Mapping of concepts related to clinical diagnostics 70
7.12 Mapping of concepts related to clinical - medications 73
7.13 Mapping of concepts clinical care provisions 76
7.14 Mapping of concepts related to clinical request and response 80
7.15 Mapping of concepts related to financial support 83
7.16 Mapping of concepts related to financial billing 85
7.17 Mapping of concepts related to financial payment 87
7.18 Mapping of concepts related to financial general 89

7.19 Mapping of concepts related to specialized public health and research 91
7.20 Mapping of concepts related to specialized definitional artifacts 93
7.21 Mapping of concepts related to specialized evidence-based medicine 97
7.22 Mapping of concepts related to specialized quality reporting and testing 99
7.23 Mapping of concepts related to specialized medication definition 101

8 Summary of the ISO 13606-1:2019 from/to FHIR R4 map 107
8.1 Goals 107
8.2 Approach 107
8.3 Findings 107

8.4 Mapping issues 107

9 Mapping of concepts from ISO 13606-1:2019 to FHIR 108
9.1 Mapping of concepts related to EHR Component EHR Extract 108
9.2 Mapping of concepts related to EHR Component Folder 110
9.3 Mapping of concepts related to EHR Component Composition 112
9.4 Mapping of concepts related to EHR Component Entry 114
9.5 Mapping of concepts related to EHR Component Item 116
9.6 Mapping of concepts related to EHR component Common properties of record components 118
9.7 Mapping of concepts related to EHR component Base component 118
9.8 Mapping of concepts related to EHR component Record component 120
9.9 Mapping of concepts related to EHR component Attestation 122
9.10 Mapping of concepts related to EHR component Link 124
9.11 Mapping of concepts related to EHR component External link 126
9.12 General principles for mapping elements and data values 128
9.13 Mapping of concepts related to Elements and data values Instance identifier 133
9.14 Mapping of concepts related to Elements and data values URI 135
9.15 Mapping of concepts related to Elements and data values uid 137
9.16 Mapping of concepts related to Elements and data values Attachment 139
9.17 Mapping of concepts related to Elements and data values SampleData 142
9.18 Mapping of concepts related to Elements and data values Point in time 144
9.19 Mapping of concepts related to Elements and data values Date time 146
9.20 Mapping of concepts related to Elements and data values Date 148
9.21 Mapping of concepts related to Elements and data values Time 150
9.22 Mapping of concepts related to Elements and data values Period 152
9.23 Mapping of concepts related to Elements and data values Timing 154
9.24 Mapping of concepts related to Elements and data values Physical Quantity 156
9.25 Mapping of concepts related to Elements and data values Coded value 159
9.26 Mapping of concepts related to Elements and data values Coded simple 161
9.27 Mapping of concepts related to Elements and data values Simple text 163
9.28 Mapping of concepts related to Elements and data values String 165
9.29 Mapping of concepts related to Elements and data values Annotation 167
9.30 Mapping of concepts related to Elements and data values Integer 169
9.31 Mapping of concepts related to Elements and data values Real 171
9.32 Mapping of concepts related to Elements and data values Boolean 173
9.33 Mapping of concepts related to Demographics PersonName 175
9.34 Mapping of concepts related to Demographics TelecommunicationAddress 177
9.35 Mapping of concepts related to Demographics LocationAddress 179
9.36 Mapping of concepts related to Demographics Attestation info 182
9.37 Mapping of concepts related to value sets 184
9.38 Mapping of concepts value set Link 186
9.39 Mapping of concepts value set Version_status 188
9.40 Mapping of concepts related to value Set Null_flavour 189

10 Challenges, constraints, and recommendations for a standardization roadmap to align the HL7 FHIR and ISO 13606-3:2019 standards 190
10.1 Purpose of this Clause 190
10.2 Importance of HL7 FHIR and ISO 13606-3:2019 alignment 191
10.3 Overview of the HL7 FHIR functional/reporting model 191
10.3.1 StructureDefinition and resource profiling 191

10.3.2 Meta information 191
10.3.3 Extension mechanism 191
10.3.4 Slicing mechanism 192
10.3.5 Changing knowledge and adaptability 192
10.3.6 Base reference models specialization 192
10.4 Overview of ISO 13606-3:2019 192
10.5 Differences and similarities between the standards in terms of information structure composition mechanisms 193
10.5.1 Main concepts 193

10.5.2 Similarities 193
10.5.3 Differences 193
10.6 Benefits found from the combined use of FHIR and ISO 13606-3 193
10.6.1 Enhanced semantic interoperability 193
10.6.2 Flexibility in data modeling 194
10.6.3 Reusability and standardization 194
10.6.4 Efficient data exchange 194
10.6.5 Enhanced clinical validity 194
10.6.6 Improved data governance and quality 194
10.7 Example of a combination of the ISO 13606-3:2019 "Health Condition" reference archetype with FHIR 194
10.7.1 General 194
10.7.2 Detailed example of combined specification 195
10.7.3 Hypothetical FHIR Profile: Health Condition 196

11 Mapping tables guiding the representation of reference archetypes as FHIR resources 198
11.1 Mapping of properties related to reference archetypes for demographic entities 198
11.2 Mapping of properties related to reference archetypes for clinical information specifications 200

Annex A (informative) Mapping between HL7 FHIR, the ISO 13606 series and ISO 13972 217
