

ISO/PAS 24305:2025-07 (E)

Health informatics - Guidelines for implementation of HL7 FHIR based on ISO 13940:2015, ISO 13606-1:2019 and ISO 13606-3:2019

Contents		Page
Foreword		vi
Introduction		vii
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Summary of the ISO 13940:2015 to FHIR R4 map	2
4.1	Goals	2
4.2	Approach	2
4.3	Findings	2
4.4	Mapping issues	2
5	Mapping of concepts from 13940:2015 to FHIR R4	2
5.1	Mapping of concepts related to healthcare actors	2
5.2	Mapping of concepts related to healthcare matters	6
5.3	Mapping of concepts related to activities	12
5.4	Mapping of concepts related to process	22
5.5	Mapping of concepts related to healthcare planning	25
5.6	Mapping of concepts related to time	29
5.7	Mapping of concepts related to responsibilities	35
5.8	Mapping of concepts related to information management	39
6	Summary of the FHIR R4 to ISO 13940:2015 map	46
6.1	Goals	46
6.2	Approach	46
6.3	Findings	46
6.4	Mapping issues	46
7	Mapping of concepts from FHIR R4 to ISO 13940:2015	47
7.1	Mapping of concepts related to foundation conformance	47
7.2	Mapping of concepts related to foundation terminology	49
7.3	Mapping of concepts related to foundation security	51
7.4	Mapping of concepts related to foundation documents	53
7.5	Mapping of concepts related to base individuals	55
7.6	Mapping of concepts related to base entities#1	58
7.7	Mapping of concepts related to base entities#2	61
7.8	Mapping of concepts related to base workflow	63
7.9	Mapping of concepts base management	65
7.10	Mapping of concepts related to clinical summary	67
7.11	Mapping of concepts related to clinical diagnostics	70
7.12	Mapping of concepts related to clinical - medications	73
7.13	Mapping of concepts clinical care provisions	76
7.14	Mapping of concepts related to clinical request and response	80
7.15	Mapping of concepts related to financial support	83
7.16	Mapping of concepts related to financial billing	85
7.17	Mapping of concepts related to financial payment	87
7.18	Mapping of concepts related to financial general	89

7.19	Mapping of concepts related to specialized public health and research	91
7.20	Mapping of concepts related to specialized definitional artifacts	93
7.21	Mapping of concepts related to specialized evidence-based medicine	97
7.22	Mapping of concepts related to specialized quality reporting and testing	99
7.23	Mapping of concepts related to specialized medication definition	101
8	Summary of the ISO 13606-1:2019 from/to FHIR R4 map	107
8.1	Goals	107
8.2	Approach	107
8.3	Findings	107
8.4	Mapping issues	107
9	Mapping of concepts from ISO 13606-1:2019 to FHIR	108
9.1	Mapping of concepts related to EHR Component EHR Extract	108
9.2	Mapping of concepts related to EHR Component Folder	110
9.3	Mapping of concepts related to EHR Component Composition	112
9.4	Mapping of concepts related to EHR Component Entry	114
9.5	Mapping of concepts related to EHR Component Item	116
9.6	Mapping of concepts related to EHR component Common properties of record components	118
9.7	Mapping of concepts related to EHR component Base component	118
9.8	Mapping of concepts related to EHR component Record component	120
9.9	Mapping of concepts related to EHR component Attestation	122
9.10	Mapping of concepts related to EHR component Link	124
9.11	Mapping of concepts related to EHR component External link	126
9.12	General principles for mapping elements and data values	128
9.13	Mapping of concepts related to Elements and data values Instance identifier	133
9.14	Mapping of concepts related to Elements and data values URI	135
9.15	Mapping of concepts related to Elements and data values uid	137
9.16	Mapping of concepts related to Elements and data values Attachment	139
9.17	Mapping of concepts related to Elements and data values SampleData	142
9.18	Mapping of concepts related to Elements and data values Point in time	144
9.19	Mapping of concepts related to Elements and data values Date time	146
9.20	Mapping of concepts related to Elements and data values Date	148
9.21	Mapping of concepts related to Elements and data values Time	150
9.22	Mapping of concepts related to Elements and data values Period	152
9.23	Mapping of concepts related to Elements and data values Timing	154
9.24	Mapping of concepts related to Elements and data values Physical Quantity	156
9.25	Mapping of concepts related to Elements and data values Coded value	159
9.26	Mapping of concepts related to Elements and data values Coded simple	161
9.27	Mapping of concepts related to Elements and data values Simple text	163
9.28	Mapping of concepts related to Elements and data values String	165
9.29	Mapping of concepts related to Elements and data values Annotation	167
9.30	Mapping of concepts related to Elements and data values Integer	169
9.31	Mapping of concepts related to Elements and data values Real	171
9.32	Mapping of concepts related to Elements and data values Boolean	173
9.33	Mapping of concepts related to Demographics PersonName	175
9.34	Mapping of concepts related to Demographics TelecommunicationAddress	177
9.35	Mapping of concepts related to Demographics LocationAddress	179
9.36	Mapping of concepts related to Demographics Attestation info	182
9.37	Mapping of concepts related to value sets	184
9.38	Mapping of concepts value set Link	186
9.39	Mapping of concepts value set Version_status	188
9.40	Mapping of concepts related to value Set Null_flavour	189
10	Challenges, constraints, and recommendations for a standardization roadmap to align the HL7 FHIR and ISO 13606-3:2019 standards	190
10.1	Purpose of this Clause	190
10.2	Importance of HL7 FHIR and ISO 13606-3:2019 alignment	191
10.3	Overview of the HL7 FHIR functional/reporting model	191
10.3.1	StructureDefinition and resource profiling	191

10.3.2	Meta information	191
10.3.3	Extension mechanism	191
10.3.4	Slicing mechanism	192
10.3.5	Changing knowledge and adaptability	192
10.3.6	Base reference models specialization	192
10.4	Overview of ISO 13606-3:2019	192
10.5	Differences and similarities between the standards in terms of information structure composition mechanisms	193
10.5.1	Main concepts	193
10.5.2	Similarities	193
10.5.3	Differences	193
10.6	Benefits found from the combined use of FHIR and ISO 13606-3	193
10.6.1	Enhanced semantic interoperability	193
10.6.2	Flexibility in data modeling	194
10.6.3	Reusability and standardization	194
10.6.4	Efficient data exchange	194
10.6.5	Enhanced clinical validity	194
10.6.6	Improved data governance and quality	194
10.7	Example of a combination of the ISO 13606-3:2019 "Health Condition" reference archetype with FHIR	194
10.7.1	General	194
10.7.2	Detailed example of combined specification	195
10.7.3	Hypothetical FHIR Profile: Health Condition	196
11	Mapping tables guiding the representation of reference archetypes as FHIR resources ..	198
11.1	Mapping of properties related to reference archetypes for demographic entities	198
11.2	Mapping of properties related to reference archetypes for clinical information specifications	200
Annex A (informative) Mapping between HL7 FHIR, the ISO 13606 series and ISO 13972		217
