Health informatics - Quality management of health data in the real world - Case study

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms, definitions and abbreviations	1
3.1	Terms and definitions	1
3.2	Abbreviations	2
4	MID-NET® system overview	2
4.1	General	2
4.2	EMR	3
4.3	Medical information storage at medical sites	4
4.4	Integrating medical information (central data centre)	4
4.5	Onsite centre	4
5	Stakeholders	4
5.1	Project owners	4
5.2	Medical sites	4
5.3	EMR and LIS vendors	4
5.4	Development and maintenance of standard codes	4
5.5	Organization governance to ensure data quality	5
5.6	MID-NET® stakeholders	5
6	Quality management overview	5
6.1	General	5
6.2	Standardization	6
6.3	Data mapping	7
6.4	Data validation	7
6.5	Governance	8
6.5.1	General	8
6.5.2	Real-time validation tool (RTVT)	8
6.5.3	Tool to check the syntax of HL7 V2.5 messages in the files contained in the folders of the storage hierarchical structure (MSVT)	8
6.5.4	Governance centre operations	8
7	Conclusion	9
Annex A (informative)	Standard code mapping table	10
Annex B (informative)	Data consistency in data categories	11
Annex C (informative)	Tools for data consistency	12
