ISO 16840-6:2026-01 (E)

Wheelchair seating - Part 6: Determination of changes in properties of seat cushions following simulated use

Contents

Page

Foreword vi

Introduction vii

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Abbreviated terms 3

5 Apparatus for characterizing and ageing cushions 3
5.1 General 3
5.2 Apparatus for characterizing cushions 3
5.3 Apparatus for ageing cushions 4

6 Test environment 5

7 Preparation and setup of cushion 6

8 Selection and order of testing 6

9 Envelopment 6
9.1 Rationale 6
9.2 Test method and reporting 6

10 Column buckling 7
10.1 Rationale 7
10.2 Test method 7
10.3 Method of calculation 7
10.4 Test report 7

11 Heat and humidity 8
11.1 Rationale 8
11.2 Test method 8
11.3 Method of calculation 9
11.4 Test report 9

12 Heated indenter compression set 10
12.1 Rationale 10
12.2 Test method 10
12.3 Method of calculation 10
12.4 Test report 10

13 Impact damping under normal conditions 11
13.1 Rationale 11
13.2 Test method 11

14 Interface pressure measurement test (pressure mapping) 11
14.1 Rationale 11

14.2 Test method 11
14.3 Method of calculation 11
14.4 Test report 12

15 Lateral and forward stiffness 12
15.1 Rationale 12
15.2 Test method 13
15.3 Test report 13

16 Leak 13
16.1 Rationale 13
16.2 Test method 13
16.3 Test report 13

17 Loadedcontourdepthandoverloaddeflection 13
17.1 Rationale 13
17.2 Test method 14
17.3 Method of calculation 14

18 Hysteresis test 14
18.1 Rationale 14
18.2 Test method 14

19 Sliding resistance 14
19.1 Rationale 14
19.2 Test method 14
19.3 Test report 14

20 10%forcedeflection 15
20.1 Rationale 15
20.2 Test method 15
20.3 Test report 15

21 Stage 2: Simulated ageing 15

22 Accelerated ageing 16
22.1 Rationale 16
22.2 Test method 16
22.2.1 70 °C accelerated ageing procedure 16
22.2.2 50 °C modified accelerated ageing procedure (for cushions made with hydrogels or other materials not intended for high temperature exposure) 16
22.3 Method of calculation 17
22.4 Test report 17

23 Bacterial soiling with cyclic loading 17
23.1 Rationale 17
23.2 Test method 17
23.2.1 Preparation of bacterial soiling broth 17
23.2.2 Bacterial exposure 18
23.3 Method of calculation 18
23.4 Test report 18

24 Cold exposure 18
24.1 Rationale 18
24.2 Test method 18
24.3 Method of evaluation 19
24.4 Test report 19

25 Cyclic loading 19
25.1 Rationale 19
25.2 Test method 19

25.3 Method of calculation 19
25.4 Test report 20

26 Disinfection 20
26.1 Rationale 20
26.2 Test method 20
26.2.1 General 20
26.2.2 Disinfection of cushion cover 20
26.2.3 Disinfection of internal cushion 20

27 Faecal soiling with cyclic loading 20
27.1 Rationale 20
27.2 Test method 20
27.3 Method of calculation 21
27.4 Test report 21

28 Heat and humidity 21
28.1 Rationale 21
28.2 Test method 21
28.3 Method of calculation 21
28.4 Test report 21

29 Laundering 22
29.1 Rationale 22
29.2 Test method 22
29.2.1 General 22
29.2.2 Laundering cushion cover 22
29.2.3 Laundering internal cushion 22
29.3 Method of calculation 22
29.4 Test report 22

30 Urinary soiling with cyclic loading 22
30.1 Rationale 22
30.2 Test method 23
30.3 Method of calculation 23
30.4 Test report 23

31 UV and ozone exposure 23
31.1 Rationale 23
31.2 Test method 23
31.3 Method of calculation 24
31.4 Test report 24

32 Stage 3: Post-aged cushion testing 24

33 Method of calculations 24

34 Test report 24

Annex A (informative) Influences that drive changes in seat cushion performance 26
