

ISO/TS 7446:2026-01 (E)

Implementation guidance for biorisk management for laboratories and other related organizations

Contents		Page
Foreword		vi
Introduction		vii
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Context of the organization	7
4.1	Understanding the organization and its context	7
4.1.1	General	7
4.1.2	Organization's external context	8
4.1.3	Organization's internal context	8
4.2	Understanding the needs and expectations of interested parties	8
4.3	Determining the scope of the biorisk management system	9
4.3.1	General	9
4.3.2	Documenting the biorisk management system scope	9
4.4	Biorisk management system	10
5	Leadership	10
5.1	Leadership and commitment	10
5.2	Policy	11
5.2.1	General	11
5.2.2	Communicating the biorisk management policy	12
5.3	Roles, responsibilities and authorities	12
5.3.1	General	12
5.3.2	Top management	13
5.3.3	Senior management	14
5.3.4	Biorisk management committee	14
5.3.5	Biorisk management advisor	15
5.3.6	Scientific management	15
6	Planning	16
6.1	Actions to address risks and opportunities	16
6.2	Hazard and threat identification and analysis	18
6.3	Risk assessment	18
6.4	Risk mitigation	20
6.5	Performance evaluation	21
6.6	Biorisk management objectives and planning to achieve them	22
6.6.1	General	22
6.6.2	Biorisk management objectives	23
6.6.3	Biorisk management system control plan considerations	23
7	Support	25
7.1	Resources	25
7.1.1	General	25
7.1.2	Worker health programme	26
7.2	Competence	28
7.2.1	General	28
7.2.2	Behavioural factors and worker management	28
7.2.3	Personnel reliability measures	29
7.3	Awareness	29
7.3.1	General	29
7.3.2	Training	30

7.4	Communication and consultation.....	31
7.5	Documented information.....	32
	7.5.1 General.....	32
	7.5.2 Creating and updating.....	32
	7.5.3 Control of documented information.....	32
	7.5.4 Information security.....	33
7.6	Non-employees.....	35
7.7	Personal security.....	35
7.8	Control of suppliers.....	36
8	Operation.....	37
8.1	Operational planning and control.....	37
	8.1.1 General.....	37
	8.1.2 Facility and operational planning, design, and redesign.....	38
	8.1.3 Control measures.....	39
8.2	Commissioning and decommissioning.....	43
	8.2.1 General.....	43
	8.2.2 Commissioning.....	45
	8.2.3 Decommissioning.....	48
8.3	Maintenance, control, calibration, certification, and validation.....	50
	8.3.1 General.....	50
	8.3.2 Maintenance roles and responsibilities.....	50
	8.3.3 Maintenance documentation.....	50
	8.3.4 Maintenance planning.....	51
8.4	Physical security.....	52
8.5	Biological materials inventory.....	55
	8.5.1 General.....	55
	8.5.2 Scope of inventory.....	56
	8.5.3 Elements of the inventory process.....	56
	8.5.4 Changes to the inventory.....	58
	8.5.5 Inventory security risk assessment.....	58
	8.5.6 Verifying, reviewing, and checking inventory.....	58
8.6	Good microbiological technique (GMPP).....	58
	8.6.1 General.....	58
	8.6.2 Training and monitoring.....	59
	8.6.3 Biological hazards.....	59
	8.6.4 Personal hygiene and dress.....	59
	8.6.5 Work area and organization.....	60
	8.6.6 Aseptic technique.....	60
	8.6.7 Technical procedures for minimizing aerosol generation.....	61
	8.6.8 Use of biological safety cabinets (BSC) and other similar containment equipment.....	62
	8.6.9 Waste disposal procedures.....	62
8.7	Clothing and personal protective equipment (PPE).....	63
	8.7.1 General.....	63
	8.7.2 Personal clothing.....	63
	8.7.3 Personal protective equipment (PPE).....	63
	8.7.4 Laboratory coats.....	64
	8.7.5 Footwear.....	65
	8.7.6 Gloves.....	65
	8.7.7 Eye protection.....	65
	8.7.8 Respiratory protection.....	65
	8.7.9 PPE program.....	65
8.8	Decontamination and waste management.....	65
	8.8.1 General.....	65
	8.8.2 Decontamination processes and procedures.....	66
	8.8.3 Waste management.....	67
8.9	Emergency response and contingency planning.....	69
	8.9.1 General.....	69
	8.9.2 Identification of emergency scenarios.....	69
	8.9.3 Emergency plans.....	70
	8.9.4 Emergency plan training.....	71
	8.9.5 Emergency exercises and simulations.....	71
	8.9.6 Contingency plans.....	72

8.10	Transport of biological materials.....	73
8.10.1	General.....	73
8.10.2	Transportation planning.....	73
8.10.3	Transportation security.....	74
9	Performance evaluation.....	74
9.1	Monitoring, measurement, analysis, and evaluation.....	74
9.2	Incident investigation.....	75
9.2.1	General.....	75
9.2.2	Incident description.....	75
9.2.3	Initial incident reporting.....	75
9.2.4	Incident documentation.....	75
9.2.5	Incident analysis.....	76
9.2.6	Incident: lessons learned.....	77
9.3	Internal audit.....	78
9.3.1	General.....	78
9.3.2	Audit and inspection programme.....	78
9.3.3	Audit planning.....	81
9.3.4	Conducting audits and inspections.....	81
9.3.5	Reporting audit results.....	82
9.3.6	Audit programme record keeping.....	83
9.4	Management review.....	84
10	Improvement.....	85
10.1	General.....	85
10.2	Incident, nonconformity and corrective action.....	85
10.2.1	Nonconformity.....	85
10.2.2	Corrective action.....	87
10.2.3	Continual improvement.....	87
Annex A (informative)	Identification and characterization of biorisk.....	89
Annex B (informative)	Selection of biorisk controls.....	96
Annex C (informative)	Biorisk reduction strategies.....	100
Annex D (informative)	Biorisk management of design and construction.....	103
Annex E (informative)	Biorisk management system framework.....	114
Annex F (informative)	Training and competency.....	125
Annex G (informative)	Enhanced control measures for high biorisk activities.....	131
