|                                                                                                       |           |
|-------------------------------------------------------------------------------------------------------|-----------|
| Foreword.....                                                                                         | iv        |
| Introduction.....                                                                                     | v         |
| <b>1 Scope.....</b>                                                                                   | <b>1</b>  |
| <b>2 Normative references.....</b>                                                                    | <b>1</b>  |
| <b>3 Terms and definitions.....</b>                                                                   | <b>1</b>  |
| <b>4 General strategy for packaging design.....</b>                                                   | <b>3</b>  |
| 4.1 General.....                                                                                      | 3         |
| 4.2 Configuration of cells for therapeutic use.....                                                   | 4         |
| 4.2.1 General.....                                                                                    | 4         |
| 4.2.2 Suspension of cells.....                                                                        | 4         |
| 4.2.3 Tissue.....                                                                                     | 4         |
| 4.3 Process of containing cells for therapeutic use in packaging.....                                 | 5         |
| 4.4 Disturbances in storage and transportation including contamination.....                           | 5         |
| 4.5 Impact on external environment when cells for therapeutic use leak from packaging.....            | 5         |
| 4.6 Interaction between cells for therapeutic use and packaging.....                                  | 5         |
| 4.7 Usability of packaging in clinical facilities.....                                                | 5         |
| 4.8 Environmental impact.....                                                                         | 5         |
| <b>5 Design for packaging.....</b>                                                                    | <b>5</b>  |
| 5.1 General.....                                                                                      | 5         |
| 5.2 Enclosing process.....                                                                            | 5         |
| 5.2.1 Explanation of the enclosing process.....                                                       | 5         |
| 5.2.2 Packaging for the enclosing process.....                                                        | 6         |
| 5.3 Processes from enclosing to usage.....                                                            | 6         |
| 5.3.1 Disturbances that affect cells for therapeutic use.....                                         | 6         |
| 5.3.2 Leakage.....                                                                                    | 7         |
| 5.3.3 Interactions between cells for therapeutic use and packaging.....                               | 7         |
| 5.4 Usage.....                                                                                        | 9         |
| <b>6 Implementing packaging design.....</b>                                                           | <b>10</b> |
| 6.1 General.....                                                                                      | 10        |
| 6.2 Shape.....                                                                                        | 10        |
| 6.3 Layers.....                                                                                       | 11        |
| 6.4 Ports.....                                                                                        | 11        |
| 6.5 Packaging materials.....                                                                          | 11        |
| 6.6 Communication between packaging supplier and packaging user.....                                  | 11        |
| <b>7 Quality management.....</b>                                                                      | <b>12</b> |
| <b>8 Examples of test methods.....</b>                                                                | <b>12</b> |
| 8.1 General.....                                                                                      | 12        |
| 8.2 Test methods related to disturbance.....                                                          | 12        |
| 8.3 Test methods related to leakage.....                                                              | 12        |
| 8.4 Test methods related to interaction between cells for therapeutic use and packaging.....          | 12        |
| 8.5 Other test methods.....                                                                           | 13        |
| <b>Annex A (informative) Illustrated examples of packaging, packages and shipping containers.....</b> | <b>15</b> |
| <b>Bibliography.....</b>                                                                              | <b>18</b> |
