## Healthcare organization management - Pandemic response - Requirements for surging diagnostic demand

---

### Contents

Page

- Foreword..... iv
- Introduction..... v
- 1 Scope..... 1**
- 2 Normative references..... 1**
- 3 Terms and definitions..... 1**
- 4 Mitigating threats encountered in providing diagnostic services..... 5**
  - 4.1 Threats encountered.....5
    - 4.1.1 Identification of threats.....5
    - 4.1.2 Establishment of a threat mitigation plan.....5
  - 4.2 Supply chain disruption of resources for diagnostic testing.....5
    - 4.2.1 Supply chain integrity.....5
    - 4.2.2 Supply chain expansion.....6
    - 4.2.3 Test reliability.....6
  - 4.3 Shortage of laboratory personnel.....6
    - 4.3.1 General.....6
    - 4.3.2 Continuity of test service provision.....6
    - 4.3.3 Quality assurance.....6
  - 4.4 Health and safety of healthcare workers.....7
    - 4.4.1 General.....7
    - 4.4.2 Mental health.....7
- 5 Quality assurance..... 8**
  - 5.1 Responsibility.....8
    - 5.1.1 Qualification.....8
    - 5.1.2 Risk Management.....8
  - 5.2 Collaborative response with the stakeholders.....8
    - 5.2.1 General.....8
    - 5.2.2 Collaboration with pandemic-response authorities.....9
    - 5.2.3 Information exchange.....9
  - 5.3 Advisory committee.....9
    - 5.3.1 Structure.....9
    - 5.3.2 Role.....9
    - 5.3.3 Keeping up-to-date.....10
  - 5.4 Emergency-use IVD medical devices.....11
    - 5.4.1 General.....11
    - 5.4.2 Risk awareness.....11
    - 5.4.3 Response measures.....11
- 6 Response to the surge in diagnostic demand..... 12**
  - 6.1 Strategy to maximize the workforce.....12
    - 6.1.1 Outsourcing medical laboratory services.....12
    - 6.1.2 Reallocation of tasks.....13
  - 6.2 Strategy to maximize capacity to conduct diagnostic tests.....13
    - 6.2.1 POCT.....13
    - 6.2.2 Pooled sample molecular testing.....13
    - 6.2.3 Introduction of an automated system.....13
    - 6.2.4 Utilization of non-medical laboratories.....13
- Bibliography..... 14**
