ISO 23494-2:2026-06 (E)

Biotechnology - Provenance information model for biological material and data - Part 2: Common provenance model

Contents

Page

Foreword ... **iv**

Introduction ... **v**

1 Scope ... **1**

2 Normative references ... **1**

3 Terms and definitions ... **2**
3.1 General terms ... 2
3.2 Terms related to CPM Provenance Structures ... 4
3.3 Terms related to PROV-DM provenance structures ... 5

4 Provenance information models ... **10**
4.1 General ... 10
4.2 W3C PROV family of specifications ... 10
4.3 Common provenance model (CPM) ... 11
4.3.1 General ... 11
4.3.2 The CPM structures ... 11
4.3.3 The CPM attributes ... 13
4.3.4 Requirements on the CPM structures ... 14

5 Requirements on provenance components ... **14**
5.1 General ... 14
5.2 Identification of described objects ... 15
5.3 Identification of described objects in provenance information using the cpm:externalId attribute ... 16
5.4 Identification of described objects in provenance information using alternate PROV entities ... 16
5.5 Revisions of a PROV entity ... 18
5.6 Derivations of a PROV entity and destructive activities ... 19
5.7 Exchanging a PROV entity between PROV activities expressed in a PROV bundle ... 20
5.8 Compound PROV activities ... 21
5.9 Attribution and association of a PROV entity or PROV activity to a PROV agent ... 23

6 Requirements on finalized provenance components ... **24**
6.1 General ... 24
6.2 Basic structure of the traversal information ... 25
6.3 Extended structure of the traversal information – linking provenance components documenting non-adjacent described activities using redundant connectors ... 29
6.4 Domain specific information in finalized provenance components ... 30

7 Requirements on meta-components ... **30**
7.1 General aspects ... 30
7.2 Versioning of provenance components ... 31

Annex A (informative) **Provenance chain example** ... **33**

Annex B (informative) **Provenance chain operations and meta-components examples** ... **42**

Annex C (informative) **Traversing of a provenance chain** ... **60**

Annex D (informative) **Security Extensions** ... **62**

Bibliography ... **64**

Annex D (informative) Security Extensions 62

Bibliography 64
