

DIN ISO 20397-3:2026-10 (E)

Biotechnology - Massively parallel sequencing - Part 3: General requirements and guidance for metagenomics (ISO 20397-3:2025)

Contents

Page

Foreword.....	iv
Introduction.....	v
1 Scope.....	1
2 Normative references.....	1
3 Terms and definitions.....	1
4 Principle.....	4
4.1 General.....	4
5 Sampling strategy.....	5
5.1 General.....	5
5.2 Primary sample type.....	6
5.3 Primary sample stabilization and storage.....	6
5.4 Primary sample transportation.....	6
5.5 DNA/RNA isolation.....	7
5.6 DNA/RNA sample quality.....	7
6 Nucleic acid library preparation.....	7
7 Design and review process including sequencing strategy and assessment.....	7
7.1 General.....	7
7.2 Short read.....	7
7.3 Long read.....	8
7.4 Hybrid assembly.....	8
7.5 Sample preparation and library construction.....	8
7.6 Assessment.....	8
8 Database construction.....	9
8.1 General.....	9
8.2 Public database.....	9
8.3 Self-build database.....	9
9 Bioinformatics analysis.....	10
9.1 General.....	10
9.2 Identification list of microorganisms.....	11
10 Validation and verification.....	11
10.1 General.....	11
10.2 In silico sequence control for bioinformatics pipeline evaluation.....	11
10.3 Real sample control for pipeline evaluation.....	11
11 Evaluation.....	12
12 Test report.....	12
12.1 General.....	12
12.2 Test report content.....	12
Annex A (informative) Checklist for NA sample quality assessment before library construction.....	13
Annex B (informative) Methods for sample stabilization and storage.....	14
Annex C (informative) Bioinformatics pipeline.....	15
Bibliography.....	17
