ISO/TS 9491-2:2026-09 (E)

Biotechnology - Predictive computational models in personalized medicine research - Part 2: Requirements and recommendations for implementing computational models in clinical integrated decision support systems

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Fundamental requirements 7
4.1 General 7
4.2 Standardization requirements for clinically driven research studies 8
4.2.1 General 8
4.2.2 Reference standards to be considered in the relevant SOPs 9
4.2.3 Basic requirements and conditions for in silico models for clinical decision support systems 9
4.2.4 Defining the research project processes and project management SOPs (RPPM) involving IT systems for personalized medicine, clinical decisions and in silico modelling 10
4.2.5 Quality of clinical studies involving models and AI 10
4.2.6 Common SOPs for clinically driven research studies 11
4.2.7 General requirements and recommendations for a SOP 14
4.3 Data handling 16
4.3.1 General 16
4.3.2 Preparations prior to study start 16
4.3.3 Data collection and integration 18
4.3.4 Data cleaning, pre-processing and post-processing 19
4.3.5 Data analytics 20
4.3.6 Models reporting guidelines 21
4.4 Assessment of data availability and quality in clinically driven research studies 22
4.4.1 General 22
4.4.2 Data analytics strategies 23
4.4.3 Semantic data description at a very early stage 23
4.4.4 Design and development of data repositories 24
4.5 Data modelling and interpretability 24
4.6 Validation of existing and development of new models for different populations 25
4.7 Uncovering patient-specific and population-related patterns that can improve care 26
4.8 Reinforcing a multidisciplinary decision-making process 27
4.9 Creating a virtuous cycle of learning 28
4.10 Patient involvement 29
4.10.1 General 29
4.10.2 Legal and ethical issues 29
4.10.3 Cross-country data handling 31
4.11 Risk Management 31
4.11.1 General 31
4.11.2 Technical tasks 32
4.11.3 Timing 32
Annex A (informative) Reporting guidelines for transparent and reproducible research 34
