1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Metrological traceability chain and calibration hierarchy	7
4.1	Principles	7
4.2	Structure and nomenclature	8
4.3	Considerations in establishing metrological traceability	12
4.4	Functions of reference materials	13
5	Calibration transfer protocols	13
5.1	Availability and structure	13
5.2	Cases with primary reference measurement procedure and primary calibrator(s) giving metrological traceability to SI	14
5.3	Cases with international conventional reference measurement procedure (which is not primary) and international conventional calibrator(s) without metrological traceability to SI	15
5.4	Cases with international conventional reference measurement procedure (which is not primary) but no international conventional calibrator and without metrological traceability to SI	16
5.5	Cases with international conventional calibrator (which is not primary) but no international conventional reference measurement procedure and without metrological traceability to SI	17
5.6	Cases with manufacturer's selected measurement procedure but neither international conventional reference measurement procedure nor international conventional calibrator and without metrological traceability to SI	18
5.7	Trueness control materials	19
6	Expression of uncertainty of measurement	19
7	Validation of metrologically traceable calibration	20
8	Information on metrological traceability to be given in the instructions for use of an in vitro diagnostic medical device	21
