DIN ISO 15759:2006-05 (E)

Medical infusion equipment - Plastics caps with inserted elastomeric liner for containers manufactured by the blow-fill-seal (BFS) process (ISO 15759:2005)

Contents

Page

Foreword 2

Introduction 2

1 Scope 3

2 Normative references 3

3 Dimensions and designation 4
3.1 Plastics cap for attachment by welding technique (Form A) 4
3.2 Plastics cap for attachment by collar technique (Form B) 5
3.3 Elastomeric liner 6

4 Materials for cap and liner 6

5 Plastics cap -- Physical requirements and testing 7
5.1 Leak-resistance test 7
5.2 Opening force 7

6 Liner -- Physical requirements and testing 7
6.1 General requirements 7
6.2 Hardness 7
6.3 Fragmentation (coring) 7
6.4 Penetration force 7
6.5 Dynamic spike-retention capability 7
6.6 Static spike-retention capability of the liner and leak resistance of the piercing area 7
6.7 Resealability 7

7 Plastics cap -- Chemical requirements and testing 7

8 Liner -- Chemical requirements and testing 8

9 Biological requirements for plastics cap and liner 8

10 Packaging 8

11 Storage 8

12 Marking 8

Annex A (normative) Leak-resistance test 9

Annex B (normative) Opening force needed to expose the piercing area 10

Annex C (normative) Fragmentation (coring) 11

Annex D (normative) Penetration force 12

Annex E (normative) Dynamic spike retention capability 14

Annex F (normative) Static spike-retention capability of the liner and leak resistance of the piercing area 15

Annex G (normative) Resealability 16

Annex H (normative) Holding device for elastomeric liner 17

Annex I (normative) Reference spike 18

Bibliography 19
