Foreword 4

Introduction 5

1 Scope 8

2 Normative references 8

3 Terms and definitions 8

3.1 Terms specific to this document 8

3.2 Other technical terms related to this document 10

4 Abbreviations 10

5 Definition of the data contents and format 11

5.1 General considerations 11

5.2 Specifications for the data structure 13

5.3 Pointer section – Section 0 16

5.4 Header information – Patient data / ECG acquisition data – Section 1 18

5.5 Huffman tables – Section 2 39

5.6 ECG lead definition – Section 3 41

5.7 QRS locations, reference beat subtraction zones and protected areas – Section 4 47

5.8 Encoded type 0 reference beat data – Section 5 49

5.9 Rhythm data – Section 6 52

5.10 Global measurements – Section 7 53

5.11 Storage of full text interpretive statements – Section 8 59

5.12 Storing manufacturer specific interpretive statements and data related to the overreading trail – Section 9 61

5.13 Lead measurement block – Section 10 61

5.14 Storage of the universal ECG interpretive statement codes – Section 11 64

6 Minimum requirements for encoding and compression of the ECG signal data 67

6.1 Scope and field of application 67

6.2 Introduction 67

6.3 ECG compression methodology 68

6.4 Main results from investigations on ECG data compression in the SCP-ECG project 69

6.5 Minimum requirements for ECG data compression 70

Annex A (normative) **Encoding of alphanumeric ECG data in a multilingual environment** 72

Annex B (normative) **Definition of compliance with the SCP ECG standard** 88

Annex C (normative) **Methodology and conformance testing of the recommended ECG signal compression technique** 97

Page

Annex D (informative) **Definition of a minimum set of control and query messages for the interchange of ECG data** **133**

Annex E (informative) **Standard low-level ECG-Cart to host protocol** **148**

Annex F (informative) **Universal ECG interpretation statements codes** **161**

Annex G (informative) **Glossary** **184**

Bibliography **186**
