DIN EN 12967-1:2008-02 (D)

Medizinische Informatik - Servicearchitektur - Teil 1: Unternehmenssicht; Englische Fassung EN 12967-1:2007

Inhalt

Seite

Foreword 4

Introduction 5

1 Scope 7

2 Normative references 8

3 Terms and definitions 10
3.1 System concepts 10
3.2 Concepts relating to organisation 10
3.3 Community concepts 10
3.4 Behaviour concepts 11
3.5 Policy concepts 12
3.6 Accountability concepts 13

4 Abbreviations 14

5 Methodology for the specification of the architecture 15
5.1 The viewpoints for the specification of the architecture 15
5.2 The HISA specification procedure 16
5.2.1 The strategic paradigm 16
5.2.2 Specification of the enterprise viewpoint 17
5.2.3 Specification of the information viewpoint 18
5.2.4 Specification of the computational viewpoint 18
5.3 Iterative specification 19
5.4 Viewpoints specification languages and notations 19

6 HISA overview 20
6.1 General requirement 20
6.2 Enterprise viewpoint 20
6.3 Information viewpoint 22
6.4 Computational viewpoint 22

7 The methodology for extensions 23

8 Conformance criteria 23
8.1 Conformance of specification documents to the HISA methodology 24
8.2 Conformance of middleware products to the HISA architectural requirements 24

9 The HISA Enterprise viewpoint 25
9.1 Introduction 25
9.1.1 The regional, inter-enterprise perspective 25
9.1.2 The medical/clinical perspective 25
9.1.3 The operational/clinical and organisational process model perspective 27
9.1.4 The Healthcare Information Services and their complexity 33
9.2 The fundamental workflows and groups of users' activities to be supported by the middleware 34
9.3 General information requirements for all users' activities 35
9.3.1 Introduction 35
9.3.2 Common attributes 35
9.3.3 Extensibility 35
9.3.4 Versioning 36
9.3.5 Auditing 36
9.3.6 Handling of lifecycle 36
9.4 Subject of Care workflow 37

9.4.1 Textual description of requirements 37
9.4.2 Use case examples 39
9.5 Clinical information workflow 42
9.5.1 Textual specification of requirements 42
9.5.2 Use case examples 43
9.6 Activity management workflow 44
9.6.1 Textual description of requirements 44
9.6.2 Use case examples 47
9.7 Resources management activities 49
9.7.1 Textual description of requirements 49
9.8 Users and Authorisations management activities 50
9.8.1 Textual description of requirements 50
9.9 Classifications, coding and dictionaries management activities 51
9.9.1 Textual description of requirements 51

1 Informative Annexe: highlights on ODP 53

2 Informative Annexe: Rationale on the federative structure of the Health Information Systems architecture 56
