## Energy efficiency and savings calculation - Top-down and Bottom-up methods

---

<b>Contents</b>		<b>Page</b>
Foreword .....		4
Introduction .....		5
1	Scope .....	6
2	Normative references .....	6
3	Terms and definitions .....	6
4	Characteristics of top-down and bottom-up methods .....	11
4.1	Characteristics .....	11
4.2	Energy efficiency improvement measure .....	12
4.3	Type of energy savings .....	13
4.3.1	Total, autonomous and policy induced savings .....	13
4.3.2	Baseline and additional savings .....	15
4.4	Type of data used .....	16
4.5	System boundaries .....	16
5	Top-down saving calculations .....	17
5.1	Energy efficiency indicators .....	17
5.1.1	General .....	17
5.1.2	Structure effects and disaggregation .....	17
5.1.3	Indicator choice and savings definition .....	18
5.2	General calculation of top-down energy savings .....	18
5.2.1	Calculation approach .....	18
5.2.2	Definition of indicator types .....	18
5.2.3	Calculation of indicator values .....	19
5.2.4	Calculation of energy savings per indicator .....	21
5.3	Other issues in the calculation of top-down savings .....	23
5.3.1	General .....	23
5.3.2	Calculation alternatives .....	23
5.3.3	Energy consumption units .....	24
5.3.4	Miscellaneous .....	25
6	Bottom-up saving calculations .....	25
6.1	Elaboration on the object of assessment .....	25
6.1.1	Elementary unit of action and unitary energy savings .....	25
6.1.2	Baseline options for end-use actions .....	26
6.1.3	Saving types from bottom-up calculations .....	27
6.2	General calculation of bottom-up energy savings .....	27
6.2.1	Calculation approach .....	27
6.2.2	Step 1: Calculation of unitary gross annual energy savings .....	29
6.2.3	Step 2: Calculation of total gross annual energy savings .....	34
6.2.4	Step 3: Calculation of total annual energy savings .....	35
6.2.5	Step 4: Calculation of remaining energy savings for target year .....	37
6.2.6	Calculation of overall bottom-up energy savings, taking into account overlap .....	38
Annex A (informative)	Examples of energy efficiency indicators .....	40
A.1	Introduction .....	40
A.2	Sectors and indicators .....	40

A.2.1	Sectors covered .....	40
A.2.2	Choice of indicators on energy savings .....	40
A.3	Indicators for the residential sector .....	41
A.3.1	General .....	41
A.3.2	Space heating .....	42
A.3.3	Water heating .....	43
A.3.4	Large appliances .....	43
A.3.5	Lighting and other appliances .....	43
A.3.6	Total electricity consumption .....	43
A.3.7	Total non-electricity consumption .....	43
A.4	Indicators for the service sector .....	44
A.4.1	General .....	44
A.4.2	Total energy consumption .....	44
A.4.3	Total electricity consumption .....	45
A.4.4	Total non-electricity consumption .....	45
A.4.5	Fuels and delivered heat for space heating .....	45
A.4.6	Electricity for lighting or air-conditioning .....	45
A.4.7	Electricity for ICT and other equipment .....	45
A.5	Indicators for the transportation sector .....	45
A.5.1	General .....	45
A.5.2	Fuel use in cars .....	46
A.5.3	Fuel use in road freight transport .....	47
A.5.4	Energy use for other modes .....	47
A.6	Indicators for the Industry sector .....	47
A.6.1	General .....	47
A.6.2	Energy-intensive industry .....	48
A.6.3	Other industrial branches .....	48
<b>Annex B (informative) Level of detail and data handling in bottom up calculations .....</b>		<b>49</b>
B.1	Levels of detail in savings calculations .....	49
B.2	Harmonisation and data handling .....	50
<b>Annex C (informative) Bottom up application for buildings; boiler replacement .....</b>		<b>52</b>
C.1	Introduction .....	52
C.2	Potential examples of calculations .....	53
C.3	Example for category 2: Replacement of heating supply equipment in residential and tertiary buildings .....	54
C.3.1	Step 1: calculation of unitary gross annual energy savings .....	54
C.3.2	Step 2: total gross annual energy savings .....	57
C.3.3	Step 3: total annual energy savings .....	57
C.3.4	Step 4: total remaining energy savings for target year .....	58
<b>Bibliography .....</b>		<b>59</b>
