

ISO/TS 50008:2018 (E)

Energy management and energy savings — Building energy data management for energy performance — Guidance for a systemic data exchange approach

Contents

	Foreword
	Introduction
1	Scope
2	Normative reference
3	Terms and definitions
4	The process of obtaining and managing data
4.1	General
4.2	Process for defining data needs for energy management
4.2.1	General
4.2.2	Determination of a data management plan
4.3	Characteristics of data to be recorded in a data management plan
5	Potential issues pertaining to data for managing energy
5.1	General
5.2	Data timing
5.3	Data composition
5.4	Independent building occupants
5.5	Changes in automatically provided data
5.6	Standardization to facilitate automatically provided data
6	Documented information
6.1	Guidance on documented information
6.2	Confidentiality
Annex A	(informative) Representative data needs of energy management systems
A.1	General
A.2	Energy planning
A.3	Energy audit
A.4	Energy performance measurement
A.5	Measurement and verification of energy performance
Annex B	(informative) Protocols
Annex C	(informative) Developing measurement plans
