## Smart community infrastructures - Guidance on smart transportation for energy saving in transportation services

---

| <b>Contents</b>    |  | <b>Page</b> |
|--------------------|--|-------------|
| Foreword .....     |  | iv          |
| Introduction ..... |  | v           |
| 1                  | Scope .....  | 1           |
| 2                  | Normative references .....   | 1           |
| 3                  | Terms and definitions .....  | 1           |
| 4                  | Fundamentals .....   | 1           |
| 4.1                | Basic ideas and goals .....  | 1           |
| 4.2                | Location and objectives of smart transportation for energy saving .....  | 2           |
| 4.2.1              | General .....  | 2           |
| 4.2.2              | Locations where smart transportation can be introduced .....   | 2           |
| 4.2.3              | Objectives of introducing smart transportation .....   | 2           |
| 5                  | Targets of smart transportation for energy saving .....  | 3           |
| 5.1                | General .....  | 3           |
| 5.2                | Targets of smart transportation .....  | 4           |
| 5.2.1              | Target transportation modes .....  | 4           |
| 5.2.2              | Target technical and business contents of transportation .....   | 4           |
| 5.2.3              | Target transportation services .....   | 6           |
| 6                  | Introduction of smart transportation for energy saving .....   | 9           |
| 6.1                | Introduction of smart transportation .....   | 9           |
| 6.1.1              | General .....  | 9           |
| 6.1.2              | Services in the same transportation mode .....   | 9           |
| 6.1.3              | Inter-modal services .....   | 9           |
| 6.1.4              | Services involving interface between public and private transportation .....                                     | 10          |
| 6.2                | Selection of energy-saving options .....   | 10          |
| 6.2.1              | General .....  | 10          |
| 6.2.2              | Energy-saving options .....  | 10          |
| 6.2.3              | Criteria and parameters to be considered in the selection of energy-saving options .....                         | 10          |
| 6.3                | Adoption of energy-saving options .....  | 11          |
| 6.4                | Conformation of the performance of smart transportation after introduction .....                                 | 11          |
| 6.4.1              | General .....  | 11          |
| 6.4.2              | Monitoring of smart transportation performance when applying more than one energy-saving option .....            | 11          |
| 7                  | Maintenance of the quality of smart transportation for energy saving .....                                       | 11          |
| 7.1                | General .....  | 11          |
| 7.2                | Parameters for comparing smart transportation performance .....  | 12          |
| 7.3                | Modification of smart transportation .....   | 12          |
| 8                  | Long-term optimization of smart transportation for energy saving alongside generational and social changes ..... | 12          |
| 8.1                | General .....  | 12          |
| 8.2                | Optimization of smart transportation for current and future cities and city zones .....                          | 12          |
| 8.3                | Maintaining/discarding adopted energy-saving options .....   | 12          |
| 8.4                | Reselection of energy-saving options .....   | 12          |

|   |           |
