

DIN EN 45553:2020-11 (E)

General method for the assessment of the ability to remanufacture energy-related products

Contents		Page
European foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms, definitions and abbreviations	5
3.1	Definitions	5
3.2	Abbreviations	6
4	How to use this document	6
5	General method to assess the ability of an energy-related product to be remanufactured ..	6
5.1	Remanufacturing process steps and product attributes	6
5.2	Criteria for assessing the product attributes	7
5.2.1	Evaluation of the product attribute "Ability to be identified"	7
5.2.2	Evaluation of the product attribute "Ability to locate access points and fasteners"	8
5.2.3	Evaluation of the product attribute "Accessibility of parts"	8
5.2.4	Evaluation of the product attribute "Ability to be disassembled/assembled"	9
5.2.5	Evaluation of the product attribute "Wear and damage resistance during the remanufacturing process steps"	9
5.3	Establishing a method to assess the ability of an energy-related product to be remanufactured	10
6	Documenting the ability of an energy-related product to be remanufactured	10
6.1	General	10
6.2	Elements of the assessment	10
Annex A (Informative) Examples of quantitative methods to assess different product attributes		12
A.1	Example of a quantitative assessment of the ability to be accessible	12
A.2	Example of a quantitative assessment of the disassembly sequence and disassembly depth	12
