DIN CLC/TR 45550:2021-04 (E)

Definitions related to material efficiency

Contents

Page

European foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Terms and definitions related to material efficiency 5
4.1 General 5
4.2 Terms and definitions related to the general method for the assessment of the durability of energy-related products (from EN 45552:2020) 5
4.2.1 Terms related to durability and reliability 5
4.2.2 Terms related to functions 6
4.2.3 Terms related to the uses 7
4.2.4 Other terms 7
4.3 Terms and definitions related to the general method for the assessment of the ability to remanufacture energy-related products (from EN 45553:2020) 8
4.4 Terms and definitions related to the general methods for the assessment of the ability to repair, reuse and upgrade energy-related products (from EN 45554:2020) 8
4.5 Terms and definitions related to the general methods for assessing the recyclability and recoverability of energy-related products (from EN 45555:2019) 9
4.6 Terms and definitions related to the general method for assessing the proportion of reused components in energy-related products (from EN 45556) 11
4.7 Terms and definitions related to the general method for assessing the proportion of recycled material content in energy-related products (from EN 45557:2020) 11
4.7.1 Definitions related to materials 11
4.7.2 Other definitions 11
4.8 Terms and definitions related to the general method to declare the use of critical raw materials in energy-related products (from EN 45558:2019) 12
4.9 Terms and definitions related to the methods for providing information relating to material efficiency aspects of energy-related products (from EN 45559:2019) 14

Annex A (Informative) Alphabetic index of terms 15
