DIN CLC/TR 45550:2021-04 (E)

Definitions related to material efficiency

Contents		Page	
Europe	ean foreword	3	
Introduction		4	
1	Scope	5	
2	Normative references	5	
3	Terms and definitions	5	
4	Terms and definitions related to material efficiency		
4.1	General		
4.2	Terms and definitions related to the general method for the assessment of the durability of energy-related products (from EN 45552:2020)		
4.2.1	Terms related to durability and reliability		
4.2.2	Terms related to functions		
4.2.3	Terms related to the uses	7	
4.2.4	Other terms		
4.3	Terms and definitions related to the general method for the assessment of the ability to remanufacture energy-related products (from EN 45553:2020)		
4.4	Terms and definitions related to the general methods for the assessment of the ability to repair, reuse and upgrade energy-related products (from EN 45554:2020)	0	
4.5	Terms and definitions related to the general methods for assessing the recyclability and recoverability of energy-related products (from EN 45555:2019)	d	
4.6	Terms and definitions related to the general method for assessing the proportion of reused components in energy-related products (from EN 45556)		
4.7	Terms and definitions related to the general method for assessing the proportion of recycled material content in energy-related products (from EN 45557:2020)		
4.7.1	Definitions related to materials		
4.7.2	Other definitions		
4.8	Terms and definitions related to the general method to declare the use of critical raw materials in energy-related products (from EN 45558:2019)		
4.9	Terms and definitions related to the methods for providing information relating to material efficiency aspects of energy-related products (from EN 45559:2019)		
Annex	A (Informative) Alphabetic index of terms
