ISO 14053:2021-02 (E)

Environmental management - Material flow cost accounting - Guidance for phased implementation in organizations

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Principles 3
4.1 Understand the basic material flow and energy use 3
4.2 Ensure the reliability of physical data 3
4.3 Estimate and attribute costs to material losses and energy use 3
4.4 Link physical and monetary data 3

5 Cost calculations in a phased approach 3
5.1 General 3
5.2 Preparation phase -- Identification of the most relevant production process in the organization 3
5.3 Calculation phase 1 -- Quantification of material flows in physical units 4
5.4 Calculation phase 2 -- Calculation of material costs and waste management costs 4
5.5 Calculation phase 3 -- Calculation of energy costs 4
5.6 Calculation phase 4 -- Calculation of system costs 4
5.7 Analytical phase -- Analysis of material loss costs 4

6 Calculation methods in a phased approach and development of an improvement plan 4
6.1 General 4
6.2 MFCA summary sheet 4
6.3 Example template for the preparation phase 5
6.4 Example template for calculation phase 1 6
6.5 Example template for calculation phase 2 7
6.6 Example template for calculation phase 3 7
6.7 Example template for calculation phase 4 8
6.8 Example template for the analytical phase 8
6.9 Development of an improvement plan 10

7 Extended approach 10

Annex A (informative) Example of a phased MFCA implementation by an organization 11
