

ISO 14053:2021-02 (E)

Environmental management - Material flow cost accounting - Guidance for phased implementation in organizations

Contents	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principles	3
4.1 Understand the basic material flow and energy use	3
4.2 Ensure the reliability of physical data	3
4.3 Estimate and attribute costs to material losses and energy use	3
4.4 Link physical and monetary data	3
5 Cost calculations in a phased approach	3
5.1 General	3
5.2 Preparation phase -- Identification of the most relevant production process in the organization	3
5.3 Calculation phase 1 -- Quantification of material flows in physical units	4
5.4 Calculation phase 2 -- Calculation of material costs and waste management costs	4
5.5 Calculation phase 3 -- Calculation of energy costs	4
5.6 Calculation phase 4 -- Calculation of system costs	4
5.7 Analytical phase -- Analysis of material loss costs	4
6 Calculation methods in a phased approach and development of an improvement plan	4
6.1 General	4
6.2 MFCA summary sheet	4
6.3 Example template for the preparation phase	5
6.4 Example template for calculation phase 1	6
6.5 Example template for calculation phase 2	7
6.6 Example template for calculation phase 3	7
6.7 Example template for calculation phase 4	8
6.8 Example template for the analytical phase	8
6.9 Development of an improvement plan	10
7 Extended approach	10
Annex A (informative) Example of a phased MFCA implementation by an organization	11
Bibliography	16
