DIN EN 17463:2021-12 (E)

Valuation of Energy Related Investments (VALERI)

Contents

Page

European foreword 4

Introduction 5

1 Scope 7

2 Normative references 7

3 Terms and definitions 7

4 Symbols, abbreviations and subscripts 10

5 Valuation procedure 11

6 Setting up a model (phase A) 13
6.1 Determination and qualitative description of benefits and efforts 13
6.2 Quantification of the benefits and efforts 14
6.3 Monetisation, determination of the relevant points in time, consideration of price variations and of degradation 15
6.3.1 General 15
6.3.2 Consideration of price variation effects 16
6.3.3 Consideration of degradation 16
6.4 Number of periods to be considered 18
6.5 Consideration of risk 18
6.6 Determination of the appropriate discount rate 18

7 Calculation (phase B) 19
7.1 Determination of the NPV of the ERI (most-likely-case scenario) 19
7.1.1 General 19
7.1.2 Consideration of tax 21
7.2 Performing a sensitivity analysis under variation of all parameters containing considerable uncertainty 21
7.3 Performing a scenario analysis (best-case, worst-case, and most-likely-case scenario) 23

8 Assessment (phase C) 24
8.1 Interpretation of the results 24
8.1.1 General 24
8.1.2 Net Present Value (NPV) 24
8.1.3 Scenario and sensitivity analyses 25
8.2 Valuation of non-monetisable qualitative and quantitative effects on the decision 25

9 Reporting (phase D) 25

Annex A (informative) The NPV calculation table (basic version) with visible formulas 28

Annex B (informative) Comprehensive version of the NPV calculation table 29

Annex C (informative) Selection of the appropriate valuation method 33

Annex D (informative) Case study: Application of the valuation procedure to the integration of a cogeneration unit within an industrial organization 41

Annex E (informative) Checklist for the Valuation Report 51

Annex F (informative) Consideration of risk 53

Annex G (informative) Consideration of price variation 56
