Smart community infrastructures — Guidance on smart transportation with QR code identification and authentication in transportation and its related or additional services

Contents

| | |
|-------|---|
| | Foreword |
| | Introduction |
| 1 | Scope |
| 2 | Normative references |
| 3 | Terms and definitions |
| 4 | Concept of smart transportation with QR code identification and authentication |
| 4.1 | Background |
| 4.2 | Practical usefulness of QR codes |
| 4.3 | Satisfying the Sustainable Development Goals |
| 5 | QR code identification and authentication-applicable transportation and its related or additional services |
| 5.1 | General |
| 5.2 | Services to customers in public transportation |
| 5.3 | Services to customers in private transportation |
| 5.4 | Services to customers in inter-modal, carrier or line operational transportation for public and private purposes |
| 5.5 | Business work by operators, administrators and facilities owners of public transportation and its related or additional services |
| 5.6 | Business work by operators, administrators and facilities owners of private transportation and its related or additional services |
| 6 | QR code identification, authentication and authorization in or for smart transportation |
| 6.1 | General |
| 6.2 | QR code identification |
| 6.3 | QR code authentication |
| 6.4 | QR code authorization |
| 6.4.1 | General |
| 6.4.2 | Authorization processes |
| 6.5 | Other practically useful applications of QR codes in transportation and its related or additional services |
| 6.5.1 | General |
| 6.6 | Application to data transfer validation |
| 7 | Security of smart transportation with QR code identification and authentication |
| 7.1 | General |
| 7.2 | QR code identification and authentication security |
| 7.3 | QR code authorization security |
| 7.3.1 | General |
| 7.3.2 | Personal information collection and encryptions |
| 7.3.3 | Security procedures |
| 8 | Organization and operation of smart transportation with QR code identification and authentication |
| 8.1 | General |
| 8.2 | Secure-trusted infrastructures for QR code identification and authentication |
| 8.2.1 | Credible service management modules |

- 8.2.2 Big data analysis centres
- 8.2.3 Registration centres
- 8.2.4 Data transfer modules
- 8.2.5 Terminal application modules

9 Quality maintenance of smart transportation with QR code identification and authentication

- 9.1 General
- 9.2 Parameters to be observed
