Smart community infrastructures - Smart transportation by facial recognition payment (f-payment)

Contents

Page

Foreword ..... **iv**

Introduction ..... **v**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **1**

4 Concept of smart transportation by f-payment **1**

4.1 Background 1

4.2 F-payment application in transportation and its related services 2

4.3 Target city issues 3

4.4 Expected effectiveness 3

4.4.1 General 3

4.4.2 Customers who will benefit from f-payment 3

4.4.3 F-payment effectiveness in the service sector 4

4.4.4 F-payment effectiveness in other situations 4

4.5 Satisfying the UN Sustainable Development Goals 4

5 Facial recognition procedures in smart transportation by f-payment **4**

5.1 General 4

5.2 Facial recognition procedure 5

5.2.1 General 5

5.2.2 Facial image acquisition 5

5.2.3 Benchmark images 5

5.2.4 Facial feature extraction 5

5.2.5 Facial comparison 5

5.2.6 Pictograms, icons and symbols 5

5.2.7 Databases for f-payment 5

5.2.8 Personal privacy protection 5

5.2.9 Privacy risk management 6

6 Organization of smart transportation by f-payment **6**

6.1 General 6

6.2 Facial recognition management 7

6.2.1 Facial image registration 7

6.2.2 Facial detection 7

6.2.3 Facial image re-registration 7

6.2.4 Withdrawal from f-payment services 7

6.3 Security for facial recognition attacks 7

6.3.1 Types of facial recognition attacks 7

6.3.2 Facial duplication protection 8

6.4 Security for f-payment money transfer 8

6.5 Privacy protection 9

7 Maintenance of the quality of smart transportation by f-payment **9**

7.1 General 9

7.2 Parameters to be observed 9

7.3 Modification of smart transportation services 9

Bibliography **10**
