Smart community infrastructures - Smart transportation for newly developing areas

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Concept of smart transportation for newly developing areas	1
4.1	General.....	1
4.2	Transportation modes for newly developing areas.....	2
4.2.1	General.....	2
4.2.2	Transportation modes applicable inside newly developing areas.....	2
4.2.3	Transportation modes applied between a newly developing area and regions outside the area.....	3
5	Adoption of smart transportation for newly developing areas	3
5.1	General.....	3
5.2	Conditions for transportation mode selection.....	3
5.2.1	General.....	3
5.2.2	Transportation capacity.....	4
5.2.3	Service frequency.....	4
5.2.4	Stop/station interval.....	4
5.2.5	Geographical applicability.....	4
5.2.6	Running performance.....	4
5.2.7	Exclusive tracks and/or street lanes.....	4
5.2.8	Promotion of environmentally friendly vehicles and life-cycle performance.....	4
5.2.9	Coach convenience and safety.....	4
5.2.10	Town value and attractiveness.....	5
5.2.11	Emergency measures.....	5
5.2.12	Energy saving.....	5
5.2.13	Driverless operation applicability.....	5
5.2.14	On-time operation.....	5
5.2.15	Flexibility in track arrangements.....	5
5.3	Installation of smart transportation.....	5
6	Sustainability in quality of smart transportation for newly developing areas	5
6.1	General.....	5
6.2	Parameters to be observed.....	6
6.3	Re-optimization of smart transportation conditions.....	6
Annex A (informative) Transportation modes used in existing newly developing areas		7
