

ISO 37174:2024-02 (E)

Smart community infrastructures - Disaster risk reduction - Guidance for implementing seismometer systems

| Contents | | Page |
|-----------------------|--|-------------|
| Foreword | | iv |
| Introduction | | v |
| 1 | Scope | 1 |
| 2 | Normative references | 1 |
| 3 | Terms and definitions | 1 |
| 4 | Value, purpose and structure of the system | 2 |
| 4.1 | General | 2 |
| 4.2 | Value of utilizing seismometer systems | 2 |
| 4.3 | Purpose of use | 3 |
| 4.4 | Data specifications | 3 |
| 4.5 | Structure of the system | 3 |
| 5 | Utilization of seismometer data | 5 |
| 5.1 | General | 5 |
| 5.1.1 | Data acquisition | 5 |
| 5.1.2 | Data specifications | 6 |
| 5.1.3 | Devices and facilities available for data acquisition | 6 |
| 5.2 | Utilization of data before disasters | 6 |
| 5.3 | Utilization of data during disasters | 7 |
| 5.4 | Utilization of data after disasters | 7 |
| 6 | Functions of seismometers and data use | 7 |
| 6.1 | Purposes of using seismometer systems | 7 |
| 6.2 | Functions of seismometer systems | 10 |
| 7 | Ensuring availability and interoperability of seismometer data | 11 |
| 7.1 | Ensuring availability of seismometer data | 11 |
| 7.2 | Ensuring the interoperability of seismometer data | 11 |
| Annex A (informative) | Example of seismometer data categorization selection | 12 |
| Annex B (informative) | Recommended data table by category | 13 |
| Annex C (informative) | Mapping the usage of seismometer systems for disaster risk reduction to the disaster-management process and the ISO 37123 indicators | 16 |
| Bibliography | | 17 |
