## Smart community infrastructures - Disaster risk reduction - Guidance for implementing seismometer systems

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Value, purpose and structure of the system .....	2
4.1	General .....	2
4.2	Value of utilizing seismometer systems .....	2
4.3	Purpose of use .....	3
4.4	Data specifications .....	3
4.5	Structure of the system .....	3
5	Utilization of seismometer data .....	5
5.1	General .....	5
5.1.1	Data acquisition .....	5
5.1.2	Data specifications .....	6
5.1.3	Devices and facilities available for data acquisition .....	6
5.2	Utilization of data before disasters .....	6
5.3	Utilization of data during disasters .....	7
5.4	Utilization of data after disasters .....	7
6	Functions of seismometers and data use .....	7
6.1	Purposes of using seismometer systems .....	7
6.2	Functions of seismometer systems .....	10
7	Ensuring availability and interoperability of seismometer data .....	11
7.1	Ensuring availability of seismometer data .....	11
7.2	Ensuring the interoperability of seismometer data .....	11
Annex A (informative)	Example of seismometer data categorization selection .....	12
Annex B (informative)	Recommended data table by category .....	13
Annex C (informative)	Mapping the usage of seismometer systems for disaster risk reduction to the disaster-management process and the ISO 37123 indicators .....	16
Bibliography .....		17
