

ISO 37174:2024-02 (E)

Smart community infrastructures - Disaster risk reduction - Guidance for implementing seismometer systems

Contents	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Value, purpose and structure of the system	2
4.1 General	2
4.2 Value of utilizing seismometer systems	2
4.3 Purpose of use	3
4.4 Data specifications	3
4.5 Structure of the system	3
5 Utilization of seismometer data	5
5.1 General	5
5.1.1 Data acquisition	5
5.1.2 Data specifications	6
5.1.3 Devices and facilities available for data acquisition	6
5.2 Utilization of data before disasters	6
5.3 Utilization of data during disasters	7
5.4 Utilization of data after disasters	7
6 Functions of seismometers and data use	7
6.1 Purposes of using seismometer systems	7
6.2 Functions of seismometer systems	10
7 Ensuring availability and interoperability of seismometer data	11
7.1 Ensuring availability of seismometer data	11
7.2 Ensuring the interoperability of seismometer data	11
Annex A (informative) Example of seismometer data categorization selection	12
Annex B (informative) Recommended data table by category	13
Annex C (informative) Mapping the usage of seismometer systems for disaster risk reduction to the disaster-management process and the ISO 37123 indicators	16
Bibliography	17
