

ISO/TR 37112:2024-03 (E)

Sustainable cities and communities - Case studies in how smart city operating models support an effective public-health emergency response

Contents	Page
Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
3.1 General.....	1
3.2 Public-health emergencies.....	2
4 Case study framework — Smart city approaches to management of COVID-19	2
5 Good practice cases across all phases of the ISO 22320 command-and-control process for emergency management	4
5.1 General.....	4
5.2 PUTRAJAYA — Observation, information gathering, processing, and sharing.....	4
5.2.1 Overview — Using the city command centre to provide integrated data sensing and sharing across all agencies involved in COVID-19 management.....	4
5.2.2 Objectives of the initiative.....	5
5.2.3 What was achieved.....	5
5.2.4 How the project applied ISO 37106 guiding principles.....	6
5.2.5 Lessons learned.....	6
5.3 New York — Assessment of the situation, including forecasts.....	7
5.3.1 Overview — Use of precision spatial data to support COVID-19 operations.....	7
5.3.2 Objectives of the initiative.....	7
5.3.3 What was achieved.....	8
5.3.4 How the project applied ISO 37106 guiding principles.....	9
5.3.5 Lessons learned.....	9
5.4 China-Singapore Tianjin Eco-city (CSTEC) — Planning.....	10
5.4.1 Overview — Pandemic management map to plan COVID-19 management.....	10
5.4.2 Overview of the objectives.....	11
5.4.3 What was achieved.....	11
5.4.4 How the project applied ISO 37106 guiding principles.....	15
5.4.5 Lessons learned.....	16
5.5 Cities in Scotland — Decision-making and communication.....	17
5.5.1 Overview — Building on Scotland’s smart city ambitions to connect with and engage residents during the pandemic.....	17
5.5.2 Objectives of Scottish inter-city collaboration during the pandemic.....	17
5.5.3 What was achieved.....	17
5.5.4 How the project applied ISO 37106 guiding principles.....	18
5.5.5 Lessons learned.....	19
5.6 Wuhan — Implementation of decisions.....	20
5.6.1 Overview — Ten-day construction of smart emergency hospital to prevent COVID-19.....	20
5.6.2 Overview of the objectives.....	21
5.6.3 What was achieved.....	21
5.6.4 How the project applied ISO 37106 guiding principles.....	22
5.6.5 Lessons learned.....	23
5.7 Hangzhou — Feedback gathering and control measures.....	23
5.7.1 Overview — Health code in the city management to prevent COVID-19.....	23
5.7.2 Overview of the objectives.....	23

5.7.3	What was achieved.....	24
5.7.4	How the project applied ISO 37106 guiding principles.....	25
5.7.5	Lessons learned.....	27
6	Key themes and preliminary conclusions.....	28
6.1	Key themes.....	28
6.2	Preliminary conclusions.....	29
	Bibliography.....	31
