

ISO 37114:2025-05 (E)

Sustainable cities and communities - Appraisal framework for datasets and data processing methods that create urban management information

Contents

Page

- Foreword..... v
- Introduction..... vi
- 1 Scope..... 1**
- 2 Normative references..... 1**
- 3 Terms and definitions..... 1**
 - 3.1 Terms related to urban management information..... 2
 - 3.2 Terms related to artificial intelligence (AI)..... 2
 - 3.3 Terms related to data..... 3
- 4 Understanding the context of the appraisal framework..... 4**
 - 4.1 General..... 4
 - 4.2 Objectives for creating urban management information..... 4
 - 4.3 Principles for establishment of appraisal framework..... 5
 - 4.3.1 General..... 5
 - 4.3.2 Principles related to the visionary community..... 5
 - 4.3.3 Principles related to the citizen-centric community..... 5
 - 4.3.4 Principles related to the digital community..... 5
 - 4.3.5 Principles related to the open and collaborative community..... 6
 - 4.4 Mapping the scenario of containing datasets and data processing methods..... 6
 - 4.5 Engaging all interested parties along the data value generation chain..... 6
- 5 Overview of the appraisal framework..... 7**
- 6 Appraisal framework recommendations for the indicators classes..... 9**
 - 6.1 General..... 9
 - 6.2 Description of classes..... 10
 - 6.2.1 Indicator class..... 10
 - 6.2.2 Indicator classification class..... 10
 - 6.2.3 Metadata record class..... 11
 - 6.3 Artificial intelligence (AI) applications in indicators..... 11
- 7 Appraisal framework recommendations for the processing classes..... 11**
 - 7.1 General..... 11
 - 7.2 Description of classes..... 12
 - 7.2.1 Process class..... 12
 - 7.2.2 Product specification class..... 12
 - 7.3 Description of enumeration class..... 13
 - 7.4 Artificial intelligence (AI) applications in dataset processing..... 13
- 8 Appraisal framework recommendations for the datasets classes..... 13**
 - 8.1 General..... 13
 - 8.2 Description of classes..... 14
 - 8.2.1 Dataset class..... 14
 - 8.2.2 Metadata record class..... 15
 - 8.2.3 Value appraisal class..... 15
 - 8.3 Description of enumeration classes..... 15
 - 8.3.1 Source type class..... 15
 - 8.3.2 Geographic metadata class..... 16
 - 8.3.3 Measurement method type class..... 17
 - 8.3.4 Frequency of data collection class..... 17

| | | |
|----------|--|-----------|
| 8.3.5 | Other classification class | 18 |
| 8.4 | Artificial intelligence (AI) applications in datasets..... | 18 |
| 9 | Feature catalogue | 18 |
| 9.1 | General..... | 18 |
| 9.2 | Indicator class..... | 18 |
| 9.3 | Indicator classification class..... | 20 |
| 9.4 | Indicator classification class: Purpose type..... | 21 |
| 9.5 | Indicator classification class: Category type..... | 22 |
| 9.6 | Indicator classification class: Topic type | 23 |
| 9.7 | Metadata record class..... | 24 |
| 9.8 | Process class..... | 25 |
| 9.9 | Product specification class..... | 27 |
| 9.10 | Status type class..... | 28 |
| 9.11 | Dataset class..... | 28 |
| 9.12 | Value appraisal class..... | 30 |
| 9.13 | Source type class..... | 32 |
| 9.14 | Geographic metadata class..... | 33 |
| 9.15 | Measurement method type class..... | 33 |
| 9.16 | Frequency of data collection class..... | 34 |
| 9.17 | Other classification class..... | 35 |
| | Annex A (informative) An example for implementation of the appraisal framework..... | 37 |
| | Annex B (informative) Detailed overall figure..... | 39 |
| | Bibliography..... | 41 |
