Biodiversity - Considering biodiversity in the strategy and operations of organizations - Requirements and guidelines

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
3.1	Terms specific to biodiversity	1
3.2	Terms specific to the approaches of the organizations	2
4	Context of the biodiversity approach	5
4.1	Scope of the biodiversity approach	5
4.2	Review of existing policies, initiatives and actions	5
4.3	Consideration of interested parties	6
4.4	Staying updated	6
5	Involvement of interested parties	6
6	Identifying and prioritizing biodiversity impacts, dependencies, risks and opportunities ...	7
6.1	General	7
6.2	Identification of the material ecosystem services dependencies	7
6.3	Identification of the material impacts on biodiversity and ecosystem services	8
6.4	Identification of the material biodiversity-related risks and opportunities	8
6.5	Prioritization of the impacts, dependencies, risks and opportunities	10
7	Formalizing the biodiversity action plan	10
7.1	Organization's ambition	10
7.2	Defining objectives	10
7.3	Action planning	11
7.4	Setting indicators	12
7.5	Integrating the local context	12
8	Communication	12
8.1	General	12
8.2	Internal communication of results	13
8.3	External communication of results	13
9	Implementation, monitoring and review	13
9.1	Implementation	13
9.2	Monitoring indicators	13
9.3	Analysis of indicators' results	13
9.4	Continual improvement	14
Annex A (informative) Resources to support implementation of a biodiversity approach		15
Annex B (informative) DPSIR Framework applied to biodiversity		17
