

DIN EN 17463:2026-07 (E)

Valuation of Energy Related Investments (VALERI) (includes Amendment :2025)

Contents		Page
European foreword		4
Introduction		5
1	Scope	7
2	Normative references	7
3	Terms and definitions	7
4	Symbols, abbreviations and subscripts	10
5	Valuation procedure	11
6	Setting up a model (phase A)	13
6.1	Determination and qualitative description of benefits and efforts	13
6.2	Quantification of the benefits and efforts	14
6.3	Monetisation, determination of the relevant points in time, consideration of price variations and of degradation	15
6.3.1	General	15
6.3.2	Consideration of price variation effects	16
6.3.3	Consideration of degradation	16
6.4	Number of periods to be considered	18
6.5	Consideration of risk	18
6.6	Determination of the appropriate discount rate	18
7	Calculation (phase B)	19
7.1	Determination of the NPV of the ERI (most-likely-case scenario)	19
7.1.1	General	19
7.1.2	Consideration of tax	21
7.2	Performing a sensitivity analysis under variation of all parameters containing considerable uncertainty	21
7.3	Performing a scenario analysis (best-case, worst-case, and most-likely-case scenario) ...	23
8	Assessment (phase C)	24
8.1	Interpretation of the results	24
8.1.1	General	24
8.1.2	Net Present Value (NPV)	24
8.1.3	Scenario and sensitivity analyses	25
8.2	Valuation of non-monetisable qualitative and quantitative effects on the decision	25
9	Reporting (phase D)	25
Annex A (informative) The NPV calculation table (basic version) with visible formulas		28
Annex B (informative) Comprehensive version of the NPV calculation table		29
Annex C (informative) Selection of the appropriate valuation method		33
Annex D (informative) Case study: Application of the valuation procedure to the integration of a cogeneration unit within an industrial organization		41

Annex E (informative) Checklist for the Valuation Report	53
Annex F (informative) Consideration of risk	55
Annex G (informative) Consideration of price variation	58
Bibliography	59
