Milk — Definition and evaluation of the overall accuracy of alternative methods of milk analysis —
Part 2: Calibration and quality control in the dairy laboratory

Contents		Page
Foreword		iv
Foreword		v
Introduction		vi
1 Scope		1
2 Normative references		1
3 Terms, definitions, and symbols		1
3.1 Terms and definitions		1
3.2 Symbols		2
4 Calibration of instruments		3
4.1 General principles		3
4.2 General procedure		3
4.3 Frequency of calibration control		10
4.4 Centralized calibration		11
5 Quality control in a routine dairy laboratory		11
5.1 Verification of repeatability		11
5.2 Daily check on short-term stability of the instrument		11
5.3 Verification of bias between laboratories		14
5.4 Verification of the difference between reference and alternative method results		14
5.5 Verification of the compliance of alternative method results with a compositional requirement		16
6 Examples		18
6.1 Calculation of statistical values		18
6.2 Determination of repeatability		20
6.3 Verification of the exactness of the calibration		20
6.4 Determination of accuracy		22
6.5 Checking the difference between reference and alternative method results		22
6.6 Conclusions		22
6.7 Verification of compliance with target values and upper or lower limits		23
Bibliography		25
