ISO/TS 22117:2010-11 (E)

Microbiology of food and animal feeding stuffs - Specific requirements and guidance for proficiency testing by interlaboratory comparison

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Scheme design and purpose 2
4.1 General 2
4.2 Scheme objectives 2
4.3 Laboratory requirements for schemes 3
4.4 Choice of test matrices 3
4.5 Information on test methods used by the PT provider 3
4.6 Statistical design 3

5 Technical requirements and guidance for sample design and content 4
5.1 Target organisms level 4
5.2 Sources, characterization and traceability of organisms 4
5.3 Background and competitive flora 5
5.4 Matrix selection and effects 5

6 Sample verification by the provider 5
6.1 General 5
6.2 Sample homogeneity testing -- General considerations 5
6.3 Homogeneity testing for quantitative (enumeration) samples 6
6.4 Homogeneity testing for qualitative methods 7
6.5 Stability testing by the provider 7

7 Sample handling 8
7.1 General 8
7.2 Instructions to participants 8

8 Performance evaluations 9
8.1 General 9
8.2 Preliminary considerations 9
8.3 Quantitative methods 9
8.4 Assessment of qualitative methods 16

Annex A (informative) Example of details to be included in a PT scheme plan 19

Annex B (informative) Methods of testing for variation between portions of test materials 21

Annex C (informative) A practical method to assess long-term performance of participants in PT schemes using enumeration methods 24

Annex D (informative) Example of a safety data sheet 26

Bibliography 28
