

ISO/TS 22117:2010-11 (E)

Microbiology of food and animal feeding stuffs - Specific requirements and guidance for proficiency testing by interlaboratory comparison

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	Scheme design and purpose	2
4.1	General	2
4.2	Scheme objectives	2
4.3	Laboratory requirements for schemes	3
4.4	Choice of test matrices	3
4.5	Information on test methods used by the PT provider	3
4.6	Statistical design	3
5	Technical requirements and guidance for sample design and content	4
5.1	Target organisms level	4
5.2	Sources, characterization and traceability of organisms	4
5.3	Background and competitive flora	5
5.4	Matrix selection and effects	5
6	Sample verification by the provider	5
6.1	General	5
6.2	Sample homogeneity testing -- General considerations	5
6.3	Homogeneity testing for quantitative (enumeration) samples	6
6.4	Homogeneity testing for qualitative methods	7
6.5	Stability testing by the provider	7
7	Sample handling	8
7.1	General	8
7.2	Instructions to participants	8
8	Performance evaluations	9
8.1	General	9
8.2	Preliminary considerations	9
8.3	Quantitative methods	9
8.4	Assessment of qualitative methods	16
Annex A (informative) Example of details to be included in a PT scheme plan		19
Annex B (informative) Methods of testing for variation between portions of test materials		21
Annex C (informative) A practical method to assess long-term performance of participants in PT schemes using enumeration methods		24
Annex D (informative) Example of a safety data sheet		26
Bibliography		28
