

DIN EN ISO 21572:2013-06 (E)

Foodstuffs - Molecular biomarker analysis - Protein-based methods (ISO 21572:2013)

Contents		Page
Foreword		3
1	Scope	4
2	Normative references	4
3	Terms and definitions	4
3.1	General	4
3.2	Terms relating to antibodies	5
3.3	Terms relating to techniques	5
3.4	Terms relating to control	6
3.5	Terms relating to validation	6
4	Principle	9
5	Reagents	9
6	Laboratory equipment	9
7	Sampling	9
8	Procedure	10
8.1	General	10
8.2	Preparation of sample solution	10
8.3	Extraction	10
8.4	Preparation of calibration curves, positive controls and reference materials	10
8.5	Assay procedure	10
9	Interpretation and expression of results	11
9.1	General	11
9.2	Quantitative and semiquantitative analysis 8 9.3 Qualitative analysis	11
10	Specific parameters which may influence results	11
10.1	General	11
10.2	Special considerations	12
10.3	Assay applicability	12
11	Confirmation method	13
12	Test report	13
Annex A (informative) Detection of a protein by ELISA		15
Annex B (informative) Detection of protein(s) by lateral flow devices		25
Bibliography		32
