DIN EN ISO 16140-2:2016-11 (E)

Microbiology of the food chain - Method valida tion - Part 2: Protocol for the validation of alternative (proprietary) methods against a reference method (ISO 16140-2:2016)

Contents

Page

European foreword ... **3**

Foreword ... **4**

Introduction ... **5**

1 Scope ... **6**

2 Normative references ... **6**

3 Terms and definitions ... **6**

4 General principles for the validation of alternative methods ... **6**

5 Qualitative methods — Technical protocol for validation ... **7**

5.1 Method comparison study ... 7

5.1.1 General considerations ... 7

5.1.2 Paired or unpaired study ... 7

5.1.3 Sensitivity study ... 7

5.1.4 Relative level of detection study ... 12

5.1.5 Inclusivity and exclusivity study ... 14

5.2 Interlaboratory study ... 15

5.2.1 General considerations ... 15

5.2.2 Measurement protocol ... 15

5.2.3 Calculations and summary of data ... 17

5.2.4 Interpretation of data ... 20

6 Quantitative methods — Technical protocol for validation ... **21**

6.1 Method comparison study ... 21

6.1.1 General considerations ... 21

6.1.2 Relative trueness study ... 21

6.1.3 Accuracy profile study ... 25

6.1.4 Limit of quantification study ... 29

6.1.5 Inclusivity and exclusivity study ... 29

6.2 Interlaboratory study ... 31

6.2.1 General considerations ... 31

6.2.2 Measurement protocol ... 31

6.2.3 Calculations, summary, and interpretation of data ... 32

Annex A (informative) **Classification of sample types and suggested target combinations for validation studies** ... **35**

Annex B (normative) **Order of preference for use of naturally and artificially contaminated samples in validation studies** ... **51**

Annex C (informative) **General protocols for contamination by mixture and artificial contamination of foods** ... **52**

Annex D (informative) **Models for RLOD calculations using data from the method comparison study** ... **55**

Annex E (normative) **Points to be considered when selecting strains for testing inclusivity and exclusivity** ... **57**

Annex F (informative) **Considerations for calculations of the relative level of detection (RLOD) between laboratories as obtained in an interlaboratory study** ... **59**

Annex G (informative) **Principle of the accuracy profile for validation of quantitative models** ... **62**

Annex H (informative) **Application of the accuracy profile in the method comparison study** ... **64**

Annex I (informative) **Example of the application of the accuracy profile for an interlaboratory study** ... **67**

Bibliography ... **71**
