## Sensory analysis - Methodology - General guidance for establishing a sensory profile

| <b>Contents</b>       |   | <b>Page</b> |
|-----------------------|---|-------------|
| Foreword .....        |   | iv          |
| Introduction .....    |   | v           |
| 1                     | Scope .....   | 1           |
| 2                     | Normative references .....  | 1           |
| 3                     | Terms and definitions .....   | 1           |
| 4                     | General test conditions .....   | 3           |
| 4.1                   | Equipment and test room .....   | 3           |
| 4.2                   | Assessors .....   | 3           |
| 4.3                   | Products .....  | 4           |
| 4.4                   | Samples .....   | 4           |
| 4.5                   | Preliminary discussion .....  | 4           |
| 5                     | Descriptive methods: principle and main characteristics .....           | 5           |
| 5.1                   | Consensus profile .....   | 5           |
| 5.2                   | Deviation from reference profile (relative-to-reference scaling) .....  | 5           |
| 5.3                   | Free-choice profile .....   | 5           |
| 5.4                   | Flash profile .....   | 5           |
| 5.5                   | Quantitative descriptive profile .....                                  | 5           |
| 5.6                   | Qualitative sensory profile .....                                       | 5           |
| 5.7                   | Temporal Dominance of Sensations (TDS) .....                            | 6           |
| 6                     | Procedure for establishing a sensory profile .....                      | 6           |
| 6.1                   | General .....   | 6           |
| 6.2                   | Prepare the test .....  | 6           |
| 6.2.1                 | Select products for training .....                                      | 6           |
| 6.2.2                 | Select assessors .....  | 6           |
| 6.2.3                 | Choose the optimal attributes .....                                     | 6           |
| 6.2.4                 | Determine the order of evaluation .....                                 | 7           |
| 6.2.5                 | Select an appropriate response scale .....                              | 8           |
| 6.2.6                 | Train the assessors .....   | 8           |
| 6.3                   | Conduct the test .....  | 8           |
| 6.3.1                 | Scoresheets .....   | 8           |
| 6.3.2                 | Evaluate the samples .....  | 8           |
| 6.4                   | Statistical interpretation .....  | 8           |
| 6.5                   | Study report .....  | 9           |
| Annex A (informative) | Consensus profile .....   | 10          |
| Annex B (informative) | Deviation from reference method (or relative-to-reference rating) ..... | 12          |
| Annex C (informative) | Free-choice profile .....   | 14          |
| Annex D (informative) | Flash profile .....   | 16          |
| Annex E (informative) | Qualitative sensory profile .....                                       | 18          |
| Annex F (informative) | Quantitative descriptive profile .....                                  | 20          |

|   |           |
|---|-----------|
| <b>Annex G (informative) Temporal Dominance of Sensation (TDS) .....</b>  | <b>26</b> |
| <b>Annex H (informative) Univariate analysis when one attribute is quantified by all the assessors of a panel .....</b> | <b>30</b> |
| <b>Bibliography .....</b>   | <b>40</b> |
