European foreword 3

Foreword 4

Introduction 5

1 Scope 9

2 Normative references 9

3 Termsanddefinitions 10

4 Generalprinciplesofthesingle-laboratorydetectionorquantificationmethod validation 12
4.1 General 12
4.2 Principles of the factorial approach 13
4.3 Principles of the conventional approach 13

5 Technical protocol for validation -- Factorial approach 15
5.1 Qualitative methods 15
5.1.1 Single-laboratory method validation study against a reference method 15
5.1.2 Single-laboratory method validation study without a reference method 21
5.2 Quantitative methods 23
5.2.1 Single-laboratory method validation study against a reference method 23
5.2.2 Single-laboratory method validation study without a reference method 26

6 Technical protocol for validation -- Conventional approach 27
6.1 Qualitative methods 27
6.1.1 Single-laboratory method validation study against a reference method 27
6.1.2 Single-laboratory method validation study without a reference method 28
6.2 Quantitative methods 29
6.2.1 Single-laboratory method validation study against a reference method 29
6.2.2 Single-laboratory method validation study without a reference method 31

7 Summary of acceptability limits 34

Annex A (informative) List of factors and factor levels for factorial method validation 35

Annex B (informative) Calculation of in-house reproducibility for qualitative methods based on the LOD study described in50 6.1.2.3 37

Annex C (informative) Example of a factorial single-laboratory method validation study for a quantitative method against a reference method 38

Annex D (informative) Example of a factorial single-laboratory method validation study for a qualitative method against a reference method 44

Annex E (informative) Example of a factorial single-laboratory method validation study for the variability of the LOD for a qualitative method without a reference method50 48

Annex F (informative)Determinationofprecisioniftheartificiallycontaminatedsamples are unstable ...51

Annex G (informative) Protocol for single-laboratory validation of alternative methods for microbiologicalconfirmationandtypingprocedures 53
