DIN EN ISO 6887-1:2024-12 (E)

Microbiology of the food chain - Preparation of test samples, initial suspension and decimal dilutions for microbiological examination - Part 1: General rules for the preparation of the initial suspension and decimal dilutions (ISO 6887-1:2017 + Amd 1:2024) (includes Amendment A1:2024)

European foreword ... 4

[A1] European foreword to Amendment A1 [A1] ... 5

Foreword ... 6

[A1] Foreword to Amendment A1 [A1] ... 7

Introduction ... 8

1 Scope ... 9

2 Normative references ... 9

3 Terms and definitions ... 9

4 Principle ... 11

5 Diluents ... 12
5.1 Basic materials ... 12
5.2 Diluents for general use ... 12
5.2.1 Peptone salt solution ... 12
5.2.2 Buffered peptone water ... 12
5.2.3 Double-strength buffered peptone water ... 13
5.3 Diluents for special purposes ... 13
5.4 Distribution and sterilization of the diluent ... 13
5.5 Performance testing for diluents ... 13

6 Apparatus ... 14

7 Sampling ... 15

8 Preparation of samples ... 15
8.1 General ... 15
8.2 Frozen products ... 15
8.2.1 General ... 15
8.2.2 Small samples defrosted before testing ... 15
8.2.3 Large pieces or blocks sampled while frozen ... 16
8.3 Hard and dry products ... 16
8.4 Dehydrated and other low-moisture products ... 17
8.5 Liquid and non-viscous products ... 17
8.6 Acidic products ... 17
8.7 High-fat (over 20 %) foods ... 17
8.8 Multi-component products ... 17
8.9 Packaged products ... 18
8.10 Surface samples (swabs and other devices) ... 18

9 Specific procedures ... 18
9.1 Test portion and initial suspension (primary dilution) ... 18
9.2 Duration of the procedure ... 19
9.3 Composite sample and larger test portion ... 19
9.3.1 Composite sample ... 19
9.3.2 Larger test portion ... 20
9.3.3 Procedure for larger test portion size ... 20
9.3.4 Validation and verification of larger test portion size ... 21

10 Further dilutions 21
10.1 Decimal dilution series 21
10.2 Other dilution series 22
Annex A (informative) [A1] Compositing and pooling procedures [A1] 23
Annex B (informative) Method for sampling frozen test pieces or blocks 24
B.1 Non-homogeneous blocks 24
B.2 Homogeneous test pieces 24
Annex C (informative) [A1] Data showing reliability of test results according to size of test portions [A1] 26
C.1 General 26
C.2 Dutch study comparing different sample sizes and effects of sample homogenization 26
C.3 French study comparing seven different sample preparation techniques 27
Annex D (informative) [A1] Verification protocol for pooling samples for qualitative tests [A1] 29
