DIN EN 1482-1:2025-02 (E)

Fertilizers, liming materials and inhibitors - Sampling and sample preparation - Part 1: General sampling provisions

Contents

Page

European foreword 5

Introduction 6

1 Scope 8

2 Normative references 8

3 Terms and definitions 9

4 Sampling plans and quantitative data 10
4.1 General 10
4.2 Sampling plans 10
4.2.1 Determination of the number of sampling units which form the sampled portion 10
4.2.2 Identification of the sampling units to be sampled 11
4.2.3 Collection of incremental samples 12
4.3 Quantitative data 12
4.3.1 Mass of incremental samples 12
4.3.2 Mass of single combined samples 12
4.3.3 Mass of multiple combined samples 12
4.3.4 Mass of final sample 13

5 Incremental sampling methods 13
5.1 General 13
5.2 Solid product in bulk being moved by conveyor belt - Stopping the belt method 13
5.2.1 General 13
5.2.2 Principle 14
5.2.3 Apparatus 14
5.2.4 Procedure 14
5.3 Solid product in bulk - Mechanical sampling whilst in motion 14
5.3.1 General 14
5.3.2 Procedure 15
5.4 Solid product in bulk - Manual sampling from falling stream 15
5.4.1 Principle 15
5.4.2 Apparatus 15
5.4.3 Procedure 15
5.5 Solid product in bulk - Manual sampling method by moving the bulk 16
5.5.1 General 16
5.5.2 Procedure 17
5.6 Solid products in packages - Reduction method using a rotating mechanical sample divider 17
5.6.1 General 17
5.6.2 Principle 17
5.6.3 Apparatus 17
5.6.4 Procedure 18
5.6.5 Precautions 19
5.7 Solid products in packages - Reduction method using a riffle divider 19
5.7.1 General 19
5.7.2 Apparatus 19
5.7.3 Procedure 20
5.8 Sampling of solid products in packages - Manual method 21

5.9 Sampling from intermediate bulk containers (IBCs) by controlled flow 22
5.9.1 General 22
5.9.2 Principle 22
5.9.3 Safety 23
5.9.4 Apparatus 23
5.9.5 Obtaining incremental samples 25
5.9.6 Precautions 26
5.10 Sampling from intermediate bulk containers (IBCs) - Manual method 26
5.10.1 Principle 26
5.10.2 Procedure 26
5.11 Sampling of liquid products 27
5.11.1 General 27
5.11.2 Apparatus 27
5.11.3 Procedure 27

6 Reduction of combined sample 30
6.1 General 30
6.2 Solid products 30
6.2.1 General 30
6.2.2 Procedure 30
6.3 Liquid products 31
6.3.1 Apparatus 31
6.3.2 Procedure 31

7 Division into final samples 31

8 Practical arrangements for final samples 31
8.1 Containers 31
8.2 Sealing of containers 31
8.3 Labelling of final samples 31
8.4 Dispatch of the final sample 32
8.5 Storage of final samples 32

9 Sampling report 32
9.1 General 32
9.2 Essential information 32
9.3 Additional information 33

Annex A (normative) Test for bias in mechanical samplers 34

A.1 Principle 34
A.2 Apparatus 34
A.3 Test conditions 34
A.4 Procedure 34
A.4.1 Collection of incremental samples 34
A.4.2 Preparation of samples 35
A.4.3 Analysis of samples 35
A.5 Expression of results 35
A.5.1 General case where the incremental samples taken by the two methods do not correspond exactly to each other 35
A.5.2 Special case where the incremental samples taken by the two methods correspond exactly to each other 36
A.6 Interpretation of the results 36

Annex B (informative) Examples of rotating sample dividers 37

Annex C (normative) Test for bias in a rotary divider 40

Annex D (informative) Examples of apparatus for sampling liquid products 41

Annex E (normative) Methods of mixing for liquid products 49

E.1 General 49
E.2 Small containers 49
E.2.1 Hand shaking 49
E.2.2 Rocking 49
E.3 Drums and casks (up to about 1,8 m deep) 49
E.3.1 Rocking in a see-saw fashion 49
E.3.2 Rolling to and from 49
E.3.3 Mechanically driven drum shaker or roller 49
E.3.4 Mechanical mixing 49
E.3.5 Hand mixing 51
E.3.6 Compressed gas 52
E.4 Shallow tanks 52
E.5 Deep tanks 53
E.5.1 General 53
E.5.2 Pumped circulation 53
E.5.3 Compressed gas 53
E.6 Precautions for sampling multi-phase liquids, including slurries 53
E.7 Precautions for sampling liquids with significant vapour pressure 54
E.7.1 Introduction 54
E.7.2 General precautions 54
E.7.3 Gases liquefied by pressure at ambient temperatures 54
E.8 Precautions against static electricity 54
E.8.1 Generation of static electricity 54
E.8.2 Discharge of static electricity 55
