

ISO 5354-1:2025-06 (E)

Molecular biomarkers - Detection of DNA in cotton used for textile production - Part 1: Extraction of DNA from cotton, cottonseed and raw materials derived therefrom

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	Principle	3
5	Identification of a suitable cotton endogenous DNA marker	3
6	Test sample preparation	3
7	Assessment of DNA extraction methods for different cotton production stages	4
7.1	General	4
7.2	Results from the single laboratory analysis of DNA extraction methods	4
7.3	Conclusion	5
8	Storage	5
9	DNA quantitation	5
10	DNA quality control	5
10.1	General	5
10.2	Use of SAH7 marker as a cotton DNA quality control assay	5
10.3	Analysis for PCR inhibitors	6
10.4	Cotton matrix control method	6
10.4.1	Results	6
11	Test report	6
Annex A (informative) Cotton endogenous control analysis		8
Annex B (informative) Assessment of DNA extraction methods for different cotton production stages		10
Annex C (informative) PCR method to detect SAH7 gene target DNA in cotton		14
Annex D (informative) Evaluation of DNA isolated with a commercial spin column-based DNA extraction system designed for the extraction of DNA from stool samples with the SAH7 method		16
Bibliography		20
