ISO 25247:2026-06 (E)

Treatment of aquaculture effluent in closed and semi-closed aquaculture systems - Principles, methods and guidance

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Basic principles 3
4.1 Ecological priority 3
4.2 Source reduction 3
4.3 Discharge control 3

5 Effluent pollution minimization 3
5.1 Reduce and valorize the generation and discharge of aquaculture effluents 3
5.2 Reduce the content of pollutants in effluent 3
5.3 Make awareness raising a priority 4

6 Discharge management 4
6.1 Aquaculture effluent treatment 4
6.2 Determination of control items and concentration limitations of effluent discharge 4
6.3 Discharge monitoring 5
6.3.1 General 5
6.3.2 Sampling 5
6.3.3 Determination of water quality 5

Annex A (informative) Example of treatment technology for effluent from Litopenaeus vannamei pond culture system 6

Bibliography 8
