Sensory analysis - Methods for assessing modifications to the flavours of foodstuffs due to packaging

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Principle 3
4.1 Assessment of the inherent odour of the packaging material 3
4.2 Assessment of the effect of the packaging material on the flavour of the foodstuff 3

5 Foodstuff samples 3
5.1 General 3
5.2 Preparation of samples 5

6 Samples of packaging materials 5
6.1 General 5
6.2 Preparation of the packaging material samples for assessment of inherent odour 5
6.3 Preparation of the packaging material samples for assessment of the effect on the flavour of the foodstuff 6

7 Sensory tests 7
7.1 General test conditions 7
7.2 Assessors 8
7.3 Assessment of inherent odour of the packaging material 8
7.4 Assessment of the effect of packaging material on the flavour of the foodstuff 9

8 Analysis of the results 10

9 Test report 10

Annex A (informative) Guidelines for industrialists for assessing the product risk linked to the packaging 12

Annex B (informative) List of recommended containers 14

Annex C (informative) Examples of models for foodstuff simulant/temperature 16

Annex D (informative) Example of components originating from packaging suspected of being the cause of alterations in the sensory properties of foodstuffs 18

Annex E (informative) Example of application of the non-parametric Wilcoxon test for the interpretation of the results obtained by scoring test 19
